Typography

Why Typography is important

Typography plays a pivotal role in any brand.

Using it correctly will allow the creation of easily identifiable messaging that is clear from distraction.

Typography is the art of creating and arranging text in a visual manner. With all the advertising placed in front of consumers on a daily basis, it's important to design and use type in such a way that it attracts the reader's attention and gives them a clear understanding of your message.

We chose **Montserrat** as it is a versatile typeface that can be applied in maximum domains. It comes with different weights and style.

Baloo Bhai has a distinctive heavy spurless design. It is Carefree yet confident, warm yet entertaining, sprightly yet intelligible, Baloo infuses life everywhere it goes. It perfectly reflects our brand personality.

Oswald is very fashionable, and the forcefulness of its characters makes it very special. It will be used for secondary headlines and titles.

Roboto will be the main font for our body text. The font features friendly and open curves. This makes for a more natural reading rhythm for its readers.

Each font has multiple versions of styles. We do not recommend using multiple styles in one sentence.

Roboto as Body text font will follow only Light, Regular. Emphasizes will have Bold style.
