

Share and access medical imaging data securely.

API Documentation

Create Imaging Orders and Generate Shareable Links

A Product of

**MIRACLE ADVANCE
TECHNOLOGIES CO. LTD.**

Integrate. Accelerate. Differentiate.

Version 1.6

Document Control

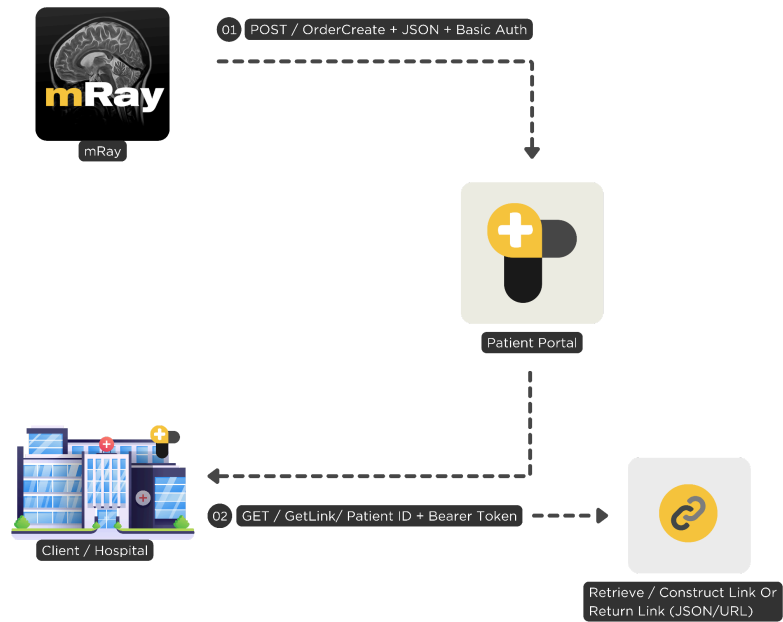

Release No.	Date	Purpose/Change	Author
V 1.0	12/03/2024	To create an Order and generate a shareable link	Shahaneaz Shaikat
V 1.1	14/03/2024	Updated Request URL and Response	Shahaneaz Shaikat
V 1.2	22/03/2024	Updated Request example code	Shahaneaz Shaikat
V 1.3	25/03/2024	Enhanced APIs with Curl Command Integration. 1. Patient Order Create and 2. Get Link	Masum Billah
V 1.4	16/04/2024	Added Data Dictionary	Shahaneaz Shaikat
V 1.5	14/06/2024	Domain name updated to Request Url	Shahaneaz Shaikat
V 1.6	08/01/2025	Updated API Data flow	Shahaneaz Shaikat

Method	POST

Data Dictionary

Field	Data Type	Expected Value	DICOM Field	Description	Required?
Site					
siteName	string	Site Name	Not applicable	The name of the site	Required
siteCode		HP11	Not applicable	Unique identifier for the site	Optional
siteAddress		Bangkok	Not applicable	Address of the site	Optional

s					
siteContactno	String	159357489	Not applicable	Contact number for the site	Optional
siteEmail	Email	HP11@gmail.com	Not applicable	Email address for the site	Optional
siteWebsite	Link	www.HP11.com	Not applicable	Website URL for the site	Optional
Patient					
patientId	String	Patient Name	PATIENTID	Name formatted encoded in DICOM standard.	Required
gender	String	M/F/Null	PATIENTSEX	Gender of the patient as given in the DICOM file	Required
ssn	string	1547896319	Not applicable	"ssn" typically refers to Social Security Number; in this context, it appears to be a unique ID	Optional
dob	String	YYYYMMDD	PATIENTBIRTH	Date of birth of the patient as given in the DICOM file	Required
Study					
studyDate	String	YYYYMMDD	STUDYDATE	The date the study was conducted is given in the DICOM file	Required

accession No	String	Unique identifier	ACCESSIONNUMBER	Accession number as given in the DICOM file	Required
modalityName	String	CT	Modality	Modality name, here given as "CT"; real DICOM might have multiple modalities in one study	Optional
examCode	String	CTB5	RequestedProcedureID	Exam code, which is not accessible in DICOM files used internally	Optional
examName	String	Text description	STUDYDESCRIPTION	Description of the study using the Study Description field from the DICOM file	Required
noofImage	Integer	3	Not applicable	"noofImage" refers to the number of images which is not directly accessible in standard DICOM files	Optional
studyInstanceid	String	Unique identifier	STUDYINSTANCEID	Unique identifier for the study instance as given in the DICOM file	Required
aetitle	String	Text	DSTAET	AE Title when getting the study sent, as given in the DICOM file	Optional
access					
mrayUrl	URL	https://example.com	Not applicable	URL to access medical records or imaging data	Required
pin	String	Alphanu	Not	Personal Identification	Required

		meric	applicable	Number, used for secure access	
ValidUntil	String	YYYYMM DD	Not applicable	Date until when access is valid	Required
