1. Onboarding

1.1. Login to the Patient Portal

Log in using your login credentials (User Name and Password)

Now, you should see the Whiteboard after logging in to the application.

1.2 Application Versions and Release Date

You can find the Patient Portal version and release date in the footer of the Patient Portal App.

The most recent version is 1.13.0, and the latest release date is Aug 08, 2025.

2. Patient Portal Whiteboard

2.1 View List

The studies are listed on the whiteboard. Once a study is uploaded through DICOM or API, it will appear there.

2.2 Filter

On the whiteboard, you can filter studies by:

- **Date:** Select a From Date and To Date, or use presets such as Today and Last 7 Days.
- **Site:** Choose a location from the Sites dropdown.
- **Keyword:** Type a patient's name or Hospital Number (HN) into the Search field.

Auto-Refresh: Enable the Auto-Refresh toggle to view new studies as they become available.

2.3 Search

The search function enables you to locate patient information using the following criteria: Patient Name, Patient Name (Thai), Site, Gender, Date of Birth (DOB), Social Security Number (SSN), and Email address.

2.4 View and Update Patient Information

Click on the patient's name to view their details.

2.5 Shareable link or QR code generator buttons on the whiteboard

On the Patient Portal whiteboard, you have the option to share reports with the patient. You can share reports with patients by:

- Copying a secure link
- Copying, emailing, or printing a QR code
- Retrieving access link via the API

The screenshot shows the Patient Portal interface with the following data for patient Joan, Doe mitchel:

Accession#	Study	Study Date	Created On	Link Expiry
20250813_1	MR BREAST BIL FOR FA - 0	11-08-2025 12:00 AM	13-08-2025 12:28:56 PM	17-06-2026 (308 days) 0

You can copy links directly. You can also copy, mail, or print the QR code. There is another way to track how many times the api has been used to retrieve links.

The screenshot shows the Patient Portal interface with the following data for patient Joan, Doe mitchel:

Accession#	Study	Study Date	Created On	Link Expiry
20250813_1	MR BREAST BIL FOR FA - 0	11-08-2025 12:00 AM	13-08-2025 12:28:56 PM	17-06-2026 (308 days) 1

A counter next to each method shows how many times it's been used. After you click the Copy button for the link, the counter updates immediately (for example, from 0 to 1). Each action, copy link, email QR code, and print QR code increments its respective counter. API usage is tracked separately and increases each time the API successfully retrieves the link.

The screenshot shows the Patient Portal interface with the following data for patient Joan, Doe mitchel:

Accession#	Study	Study Date	Created On	Link Expiry
20250813_1	MR BREAST BIL FOR FA - 0	11-08-2025 12:00 AM	13-08-2025 12:28:56 PM	17-06-2026 (308 days) 1

3. View Patient Information

Use the Patient Info page to find and manage patient demographics and identifiers.

You can filter by date range, site, and organization, and quickly search by HN or SSN to locate a specific patient.
