Application User Manual

1. General Information

1.1. Organization of the Manual

The manual is patterned to familiarize you with the frequent aspects of the application first - dashboards and search features, for instance. While doing so, the most common elements are explained so you can later relate to the terms as you look deeper into the application's features and functionalities. Items inside the Main Menu will vary depending on user roles, but the full menu is explored as the manual proceeds, and user roles are explained beforehand, so the menu options that each user role sees can be made sense of. The OPD section (Using the System) contains the most basic and necessary outpatient tasks that are carried out by the vets. Best attempts were made so the functionalities are written in a manner which follows a chronology used by most user roles in the system. In Patient Department or IPD section is a large chapter dedicated to inpatient facility management. This section explores in detail the numerous operations and management related to inpatients of the hospital. For this section, the manual advances according to the submenu inside the PetMatrix application. The following sections after that will emphasize on the additional tools and features inside the application which you may find more beneficial once you have learned your way using PetMatrix.

1.2. Additional Help

Common terms are emboldened throughout the user manual to acquaint the reader with the terms used in the application. Section numbers are indexed (numbered) and/or linked next to common keywords and task phrases (adding allergies, making an appointment, etc.), so the reader can go directly to the section to find more information on it when necessary. For easier navigation, [keywords in blue](#) are linked so you can refer back to the section where you can find details on keywords/phrases.

1.3. System Requirements

HARDWARE REQUIREMENTS:

- Processor (CPU) with 2 gigahertz (GHz) frequency or above
- A minimum of 2 GB of RAM
- Monitor Resolution 1024 X 768 or higher
- A minimum of 20 GB of available space on the hard disk
- Internet Connection Broadband (high-speed) Internet connection with a speed of 4 Mbps or higher
- Keyboard and mouse or compatible pointing device

Webcam SOFTWARE REQUIREMENTS:

Browsers:

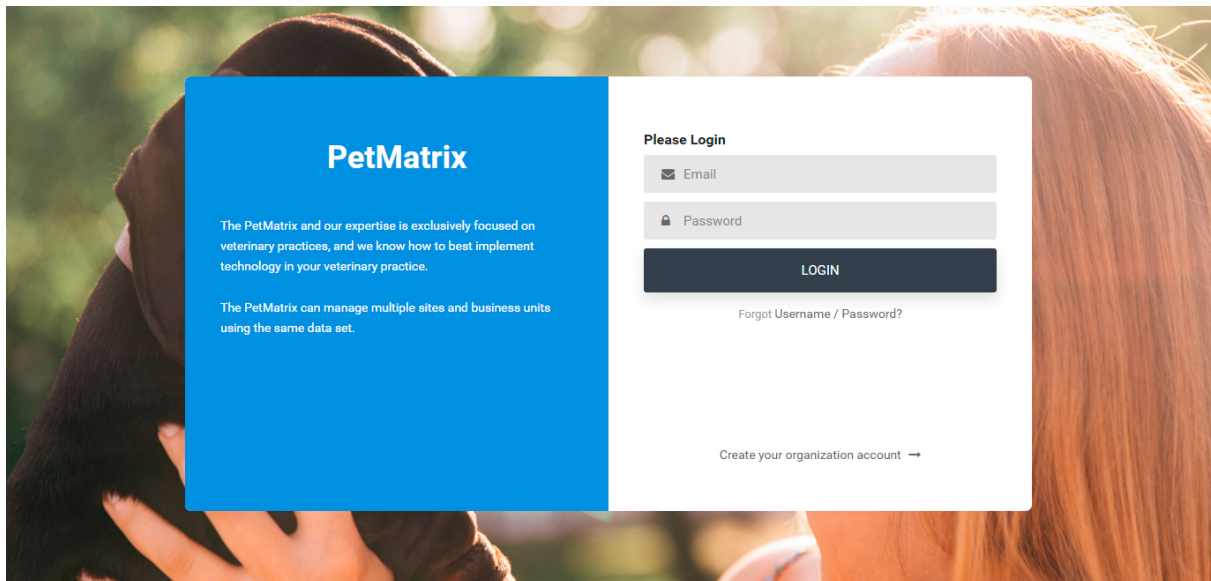

- Chrome* 36+
- Edge* 20+
- Mozilla Firefox 31+
- Internet Explorer 11+ (Windows only)
- Safari 6+ (MacOS only)

Operating System:

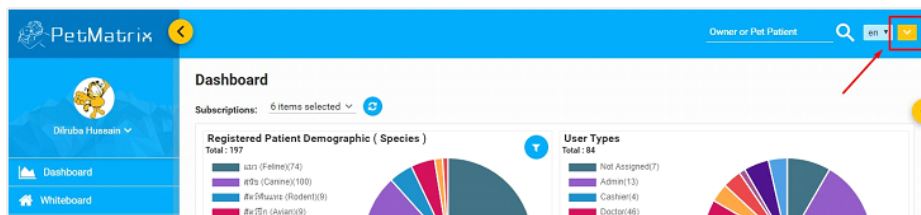

- Windows 7, Windows 8 or Windows 10
- Mac OSX 10.8, 10.9, 10.10 or 10.11

1.4. Getting Started

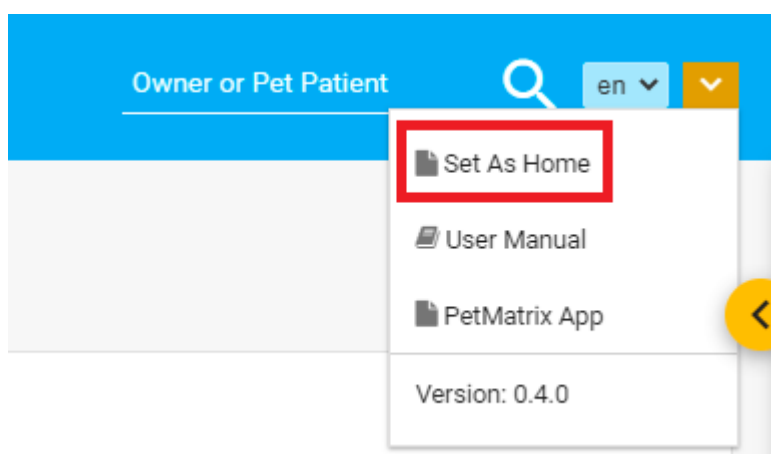

Before you can log in to PetMatrix, you will need to have your email registered by the System Administrator to be a user for the system. Go to <http://app.petmatrix.vet/#/login> and log in with your credentials. The login page should look like this

Once logged in, you should be viewing the **Dashboard**, but you can set any page to be your landing/home page by doing the following: Go to the page you want to set as the landing/home page that you want to see after you log in, and click on the orange arrow at the top-right end (corner) of the screen :

Select '**Set as home**', and the current page you are on will be set as the default page.

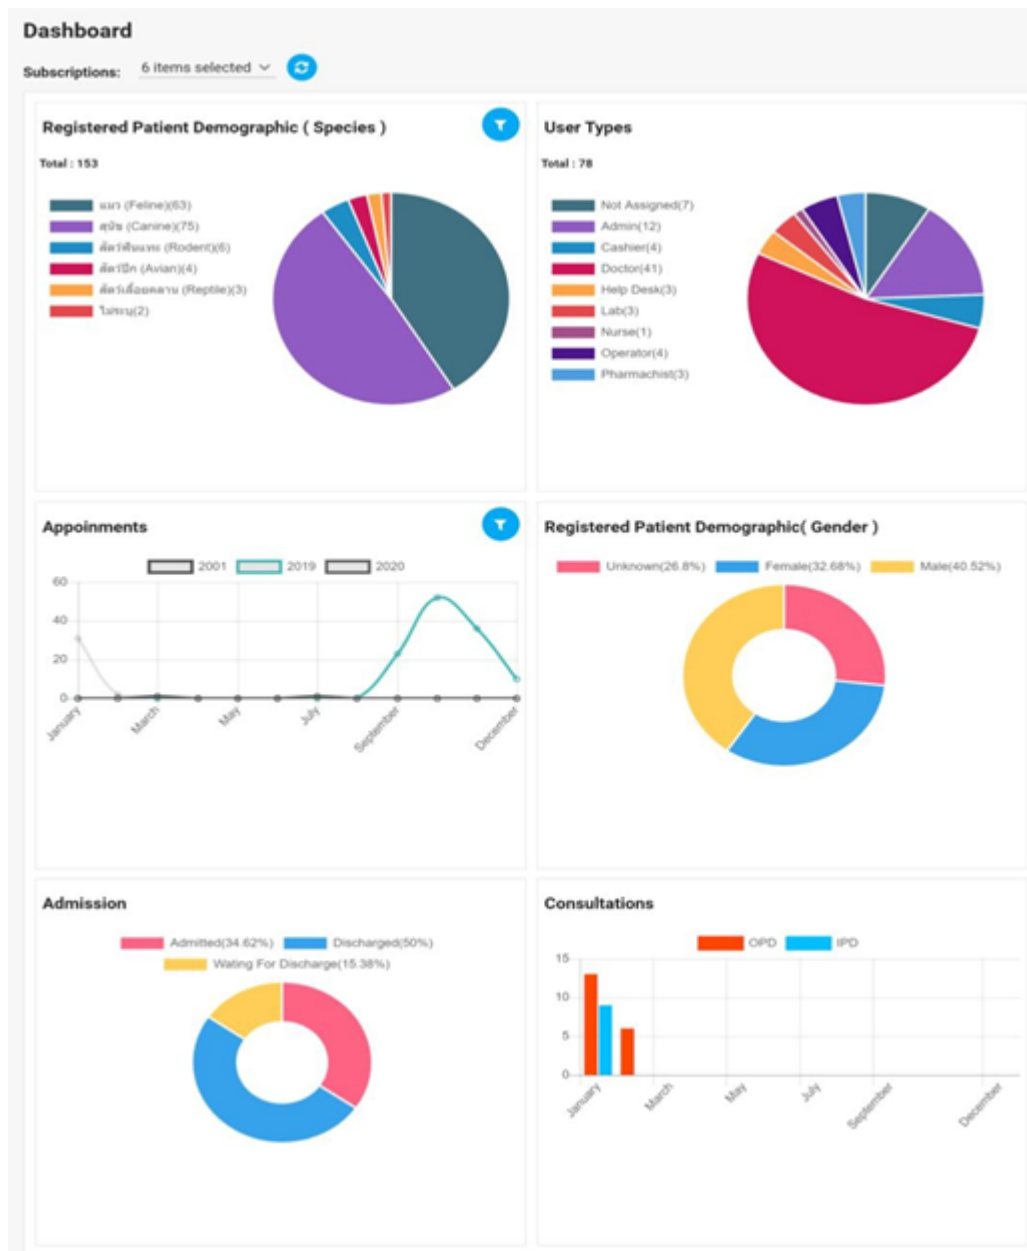

If you're viewing this manual right now, you probably know where to find the **'User Manual'** option already ;

2. System Menu

2.1. Dashboard

The Dashboard displays various graphic data presentation in one place:

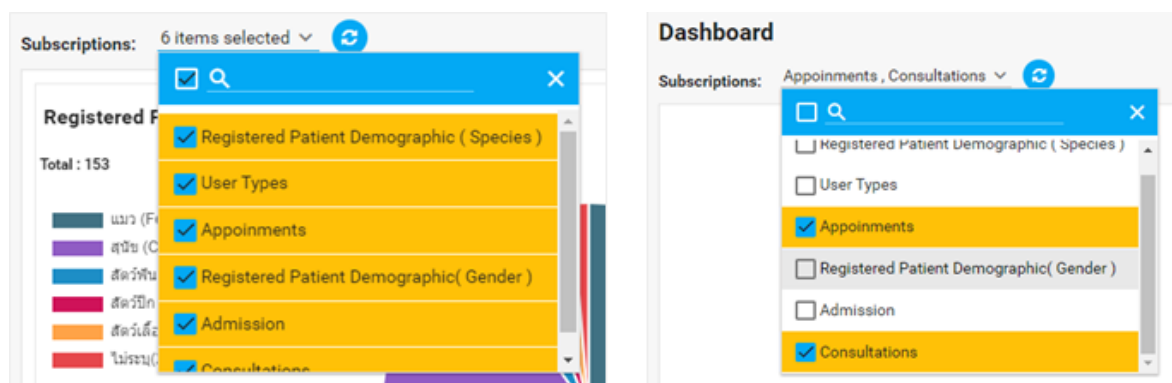

➤ For now, you can view the following analytics in the Dashboard:

- **Registered Patient Demographic (Species)** - showing the distribution of registered patients of various species.
- **Registered Patient Demographic (Gender)** - showing the composition of the number of males, females and other genders that make up the total registered number of patients.

- **Appointments** - shows, using a line graph, the number of appointments being created in each month.
- **Admission** - shows how many of the total number of admitted patients till now are on queue, admitted or discharged from the clinic
- **Consultations** - shows the total number of consultations (OPD and IPD) taken each month.
- **User Types** - shows the various user roles that are registered inside the application.

➤ You can select or deselect which subscriptions you want to see in the **Dashboard**-

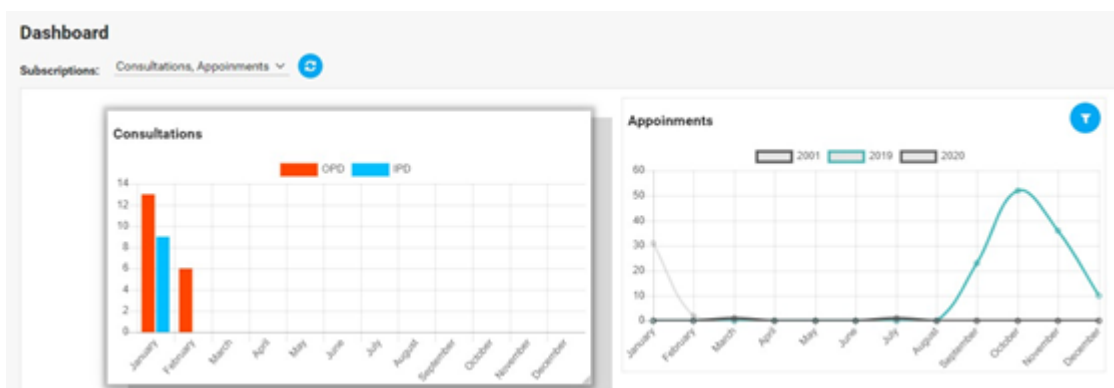

➤ Data representation is done using a number of styles including pie charts, docut charts, bar graphs, and line graphs.

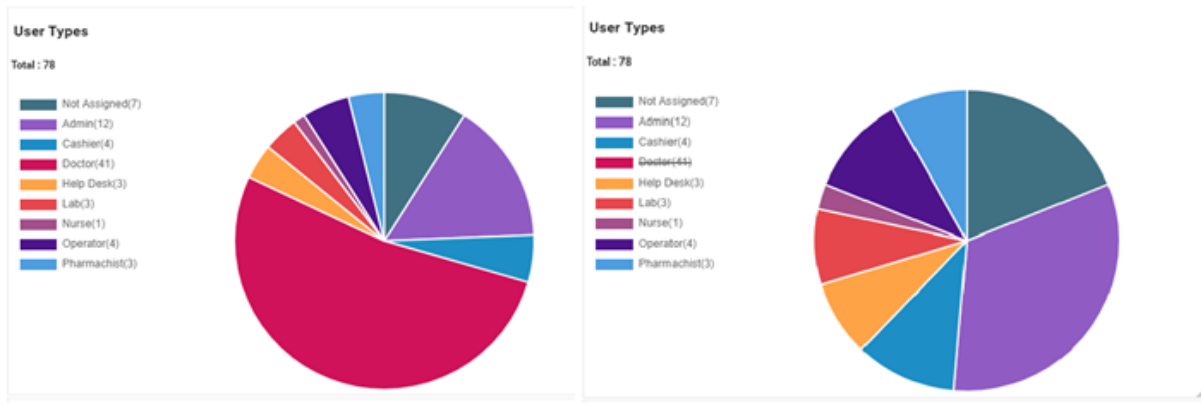

➤ Some features of the graphs are interactive-

a. You can drag and drop a card/graph and rearrange the **Dashboard**-

b. You can 'click' on an item to cut it off of the graph to see how the numbers reflect without the particular item.

c. You can reset the graphics if you wish to. The Reset button is right next to the Subscriptions dropdown:-

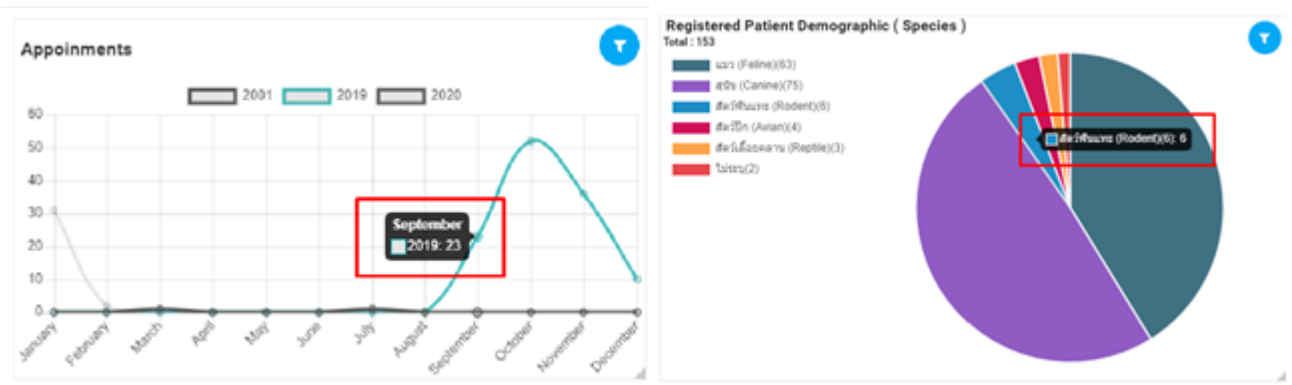

Before Resetting-

After resetting-

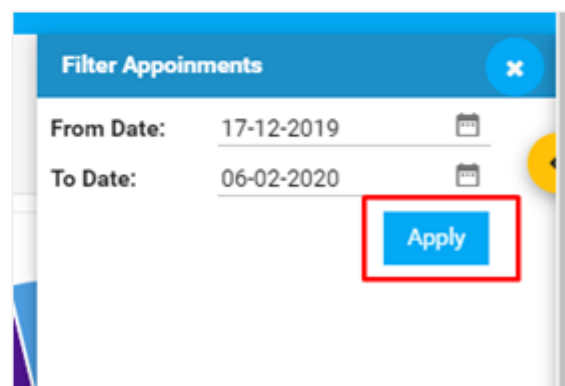

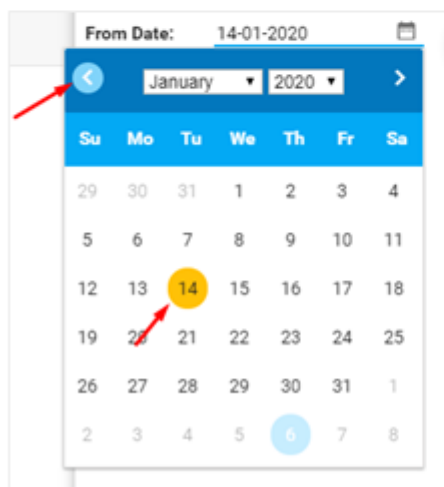

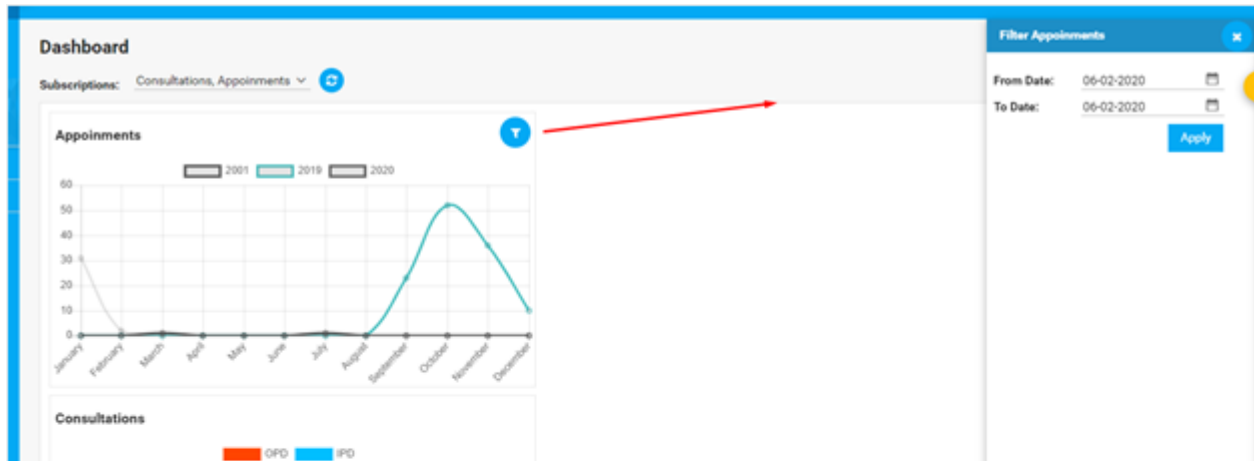

d. Hovering over a graph will show the details and information of the graph:

e. You can filter dates to select the date range for which you want to see the data:

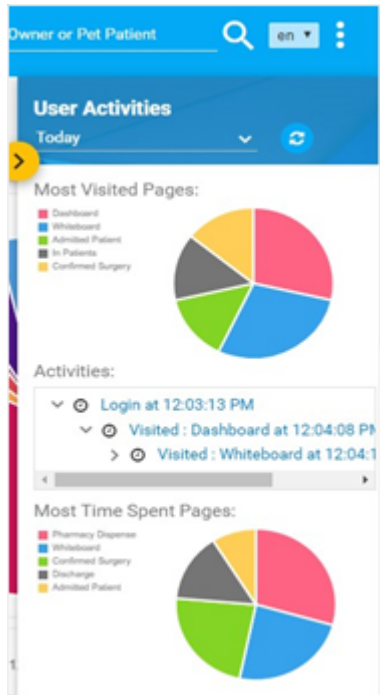

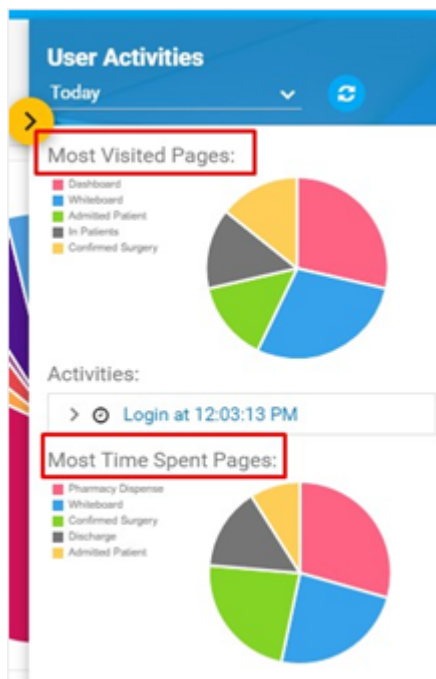

2.2. User Activities

You should be able to see a yellow button peeking from the very right of the screen. Clicking on the button opens up the User Activities panel on the right side of the screen.

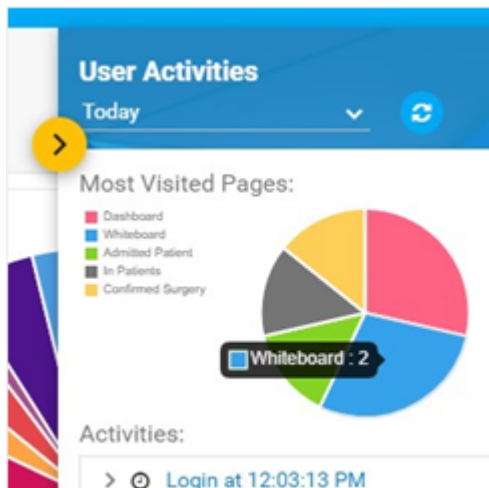

Once the panel slides out, you should be able to see *infographics* and *session-related information* about your usage of the application as the user:

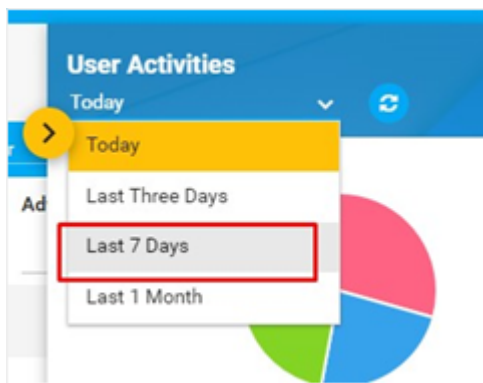

For example, you will immediately be able to see two pie charts about pages that you visit the most, and spend the most time on.

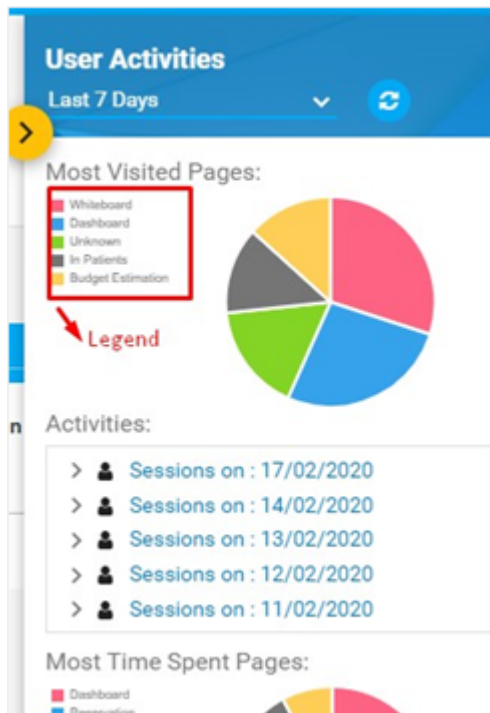

- Hovering over the pie sections shows the piece of information represented by the 'slices'.

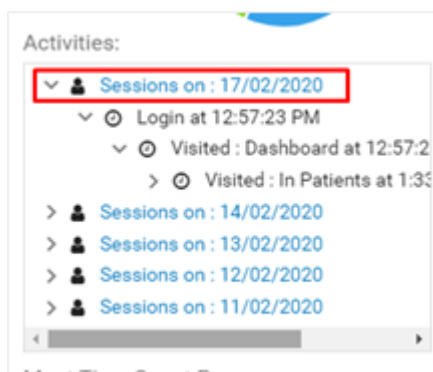

- You can view user activities for a collective number of days, e.g, 3 days/week/month.

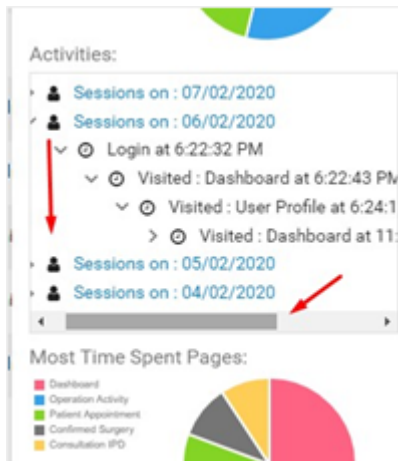

- You can see the key/legend at the left, and the *session activities* for each login by the user:

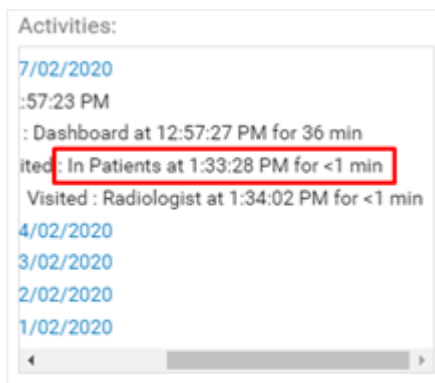

- Clicking on a session will open a dropdown to show where the user has navigated to.

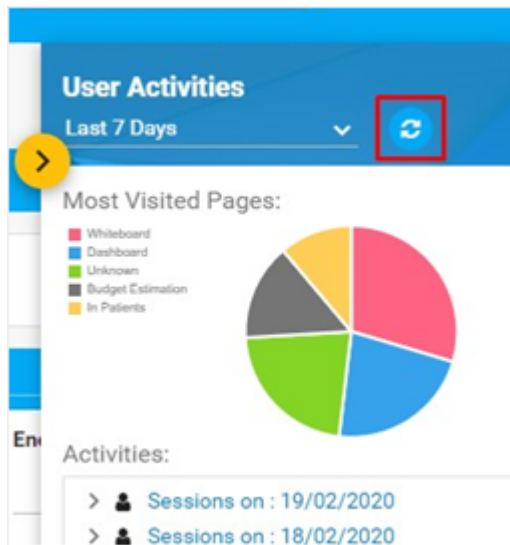

- The dropdown will continue until the 'tree' has covered all the pages that the user (that's you, btw) has visited to:

- Details of each session tells you about *the page that the user visited, the exact time of visit, and how long the user has been on that page:*

- You can hit refresh to see any updates on user activities while you are still using the application.

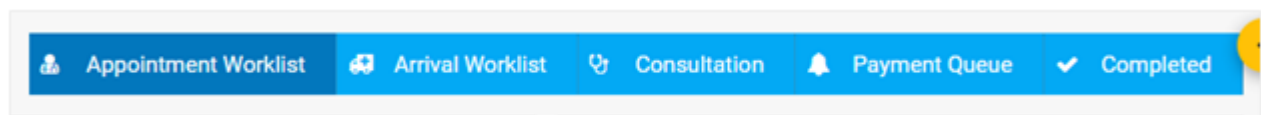

2.3. Whiteboard

The Whiteboard is where you can keep track of all the out-patients. If a patient had an appointment scheduled, it would show up in the Appointment Worklist. If a pet has walked in for a Consultation, it will have to be arrived first (to take in Vitals and record Problems and History), and then be taken to Consultation.

So the cycle is:

Look up patient ? Mark Arrival (**Arrival Worklist**) ? Start Consultation (**Consultation**) ?
Complete Consultation (**Waiting for Payment/Completed**)

Whiteboard is organized with tabs that will carry a patient record from one tab to the next until the client has completed the payments.

Saiki Konami	Kitkat	Dilruba Tariq	24-11-2019 01:11 PM	An hour	Arrived	CONSULTATION	

Whiteboard features:

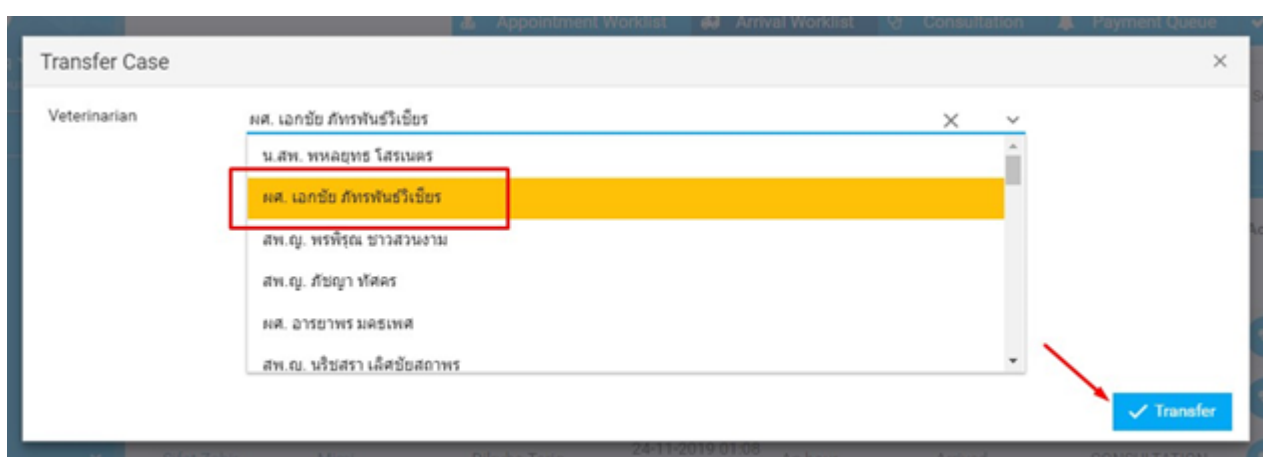

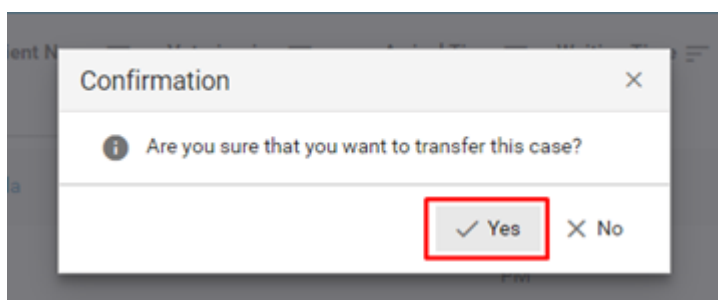

- **Auto-refresh**: the minimum seconds for auto-refresh is 1 second. You can see the yellow number icon flicker as the Whiteboard refreshes the worklist:

Client Name	Patient Name	Veterinarian	Arrival Time	Waiting Time	Status	Encounter Type	Action
		Dilruba Tariq	24-11-2019 01:03 PM	17 days	Arrived	CONSULTATION	

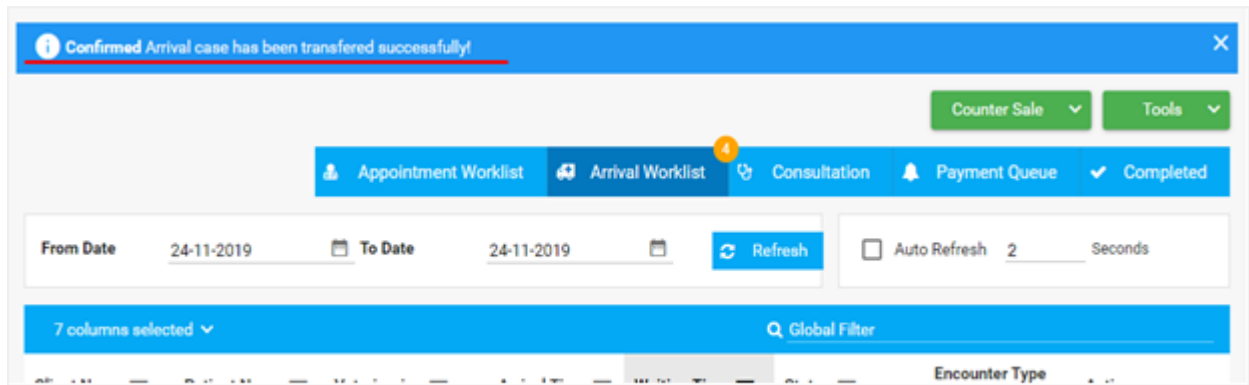

Mouse right-click options: you can *transfer a pet patient* to another veterinarian from the Arrival Worklist. Right-click anywhere inside a row and you can see the option:

Once you select transfer, you will be asked for a confirmation, followed by the veterinarian you want to transfer the case to:

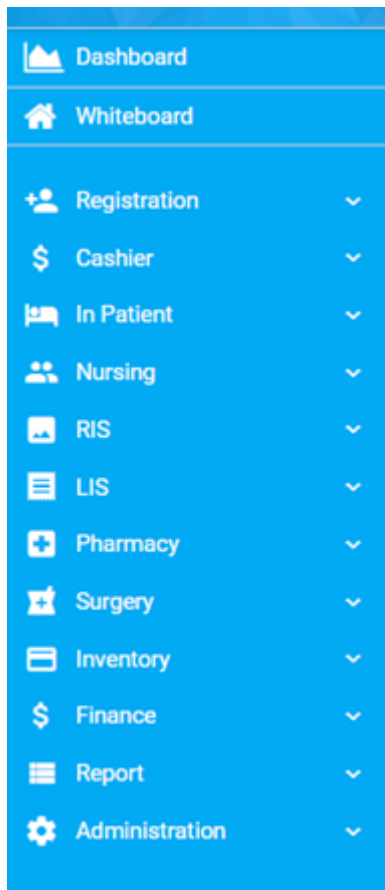

Once you have clicked on Transfer, a notification will show up at the top with a confirmation:

You can also start a **Consultation** from here directly, or click on the **Consultation** icon from inside the **Arrival Worklist**. You can find the full details in the **OPD section** of the manual as you progress. You can cancel an arrival from here, too.

2.4. Main Menu

To the left of the Dashboard is the Main Menu. The Main Menu lets you register new pet patients, manage in-patient worklists, view laboratory, and radiology reports and carry out administrative tasks. The number of options you can view in the menu depends on the user access level you are granted.

Main Menu to the left

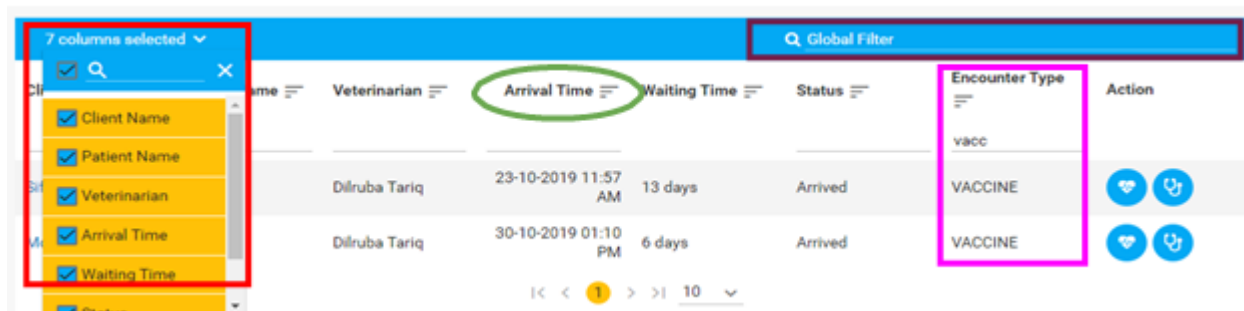

3. Understanding the Features

Before you can start to use PetMatrix, it is imperative that you learn about the small features that are incorporated throughout the application for ease of use, convenience and better user experience.

The default features you will find in almost any tabulated information list is the Column Settings option. Here's how you see it:

7 columns selected ▾							Q Global Filter
Client Name ▾	Patient Name ▾	Veterinarian ▾	Arrival Time ▾	Waiting Time ▾	Status ▾	Encounter Type ▾	Action
ชายชัช ประทุมมา	โกโก้		11-09-2019 04:13 PM	2 months	Arrived		

This is taken from an Arrival Worklist, but you can also see it on any other table that represents information. The Column Settings allow you to do 4 things:

- Select which columns to display - you can select/deselect which column you want to display in the table. For the image above, all the columns are selected. There is even a search field inside at the top of the list so you can directly type to search for a field!
- Searching for a specific information in a column - You can filter your search by typing in any keyword you want. This makes the search more narrow and faster.
- Sorting the results in a column - Clicking on the little icon beside the column name, which looks like a 'list', alphabetically sorts your search results by the column order.
- The Global Filter - this search can help filter *all the information* related to the search word you enter, and works for that table only. In other words, it searches the entire table with any keyword you enter. We can now move on to the rest of the features!

3.1. Global Search

The global search at the top right corner lets you look up a pet patient using the pet patient's name or the owner's name.

Global Search

For a more advanced search, you can use the **Advanced Search** option from **Registration** option on the **Main Menu**:

Advanced Search

- Results for the **Advanced Search** can show all the information regarding the patient you are searching for, such as **Arrivals** or **Appointments**.
- You can always do an **Advanced Search** before you register a new client/pet patient. If you find no records, you can always add a client from the **Add Owner** option inside the **Advanced Search**.

Advanced Search by Owner and Pet Patient

If you open a visit using the little arrow button beside it , you would be able to see details from that visit - the *number* of consultations, *details* of the consultations, and even *go to a consultation* in case the consultation was not completed.

Once you open the dropdown, you can see the type of visit that was made, the status of the consultation, and open a consultation if it needs to be completed.

■ You can view the pet's vaccine history from the **Vaccine tab**, or any upcoming appointments (with any/all veterinarians) from the **Appointments tab**.

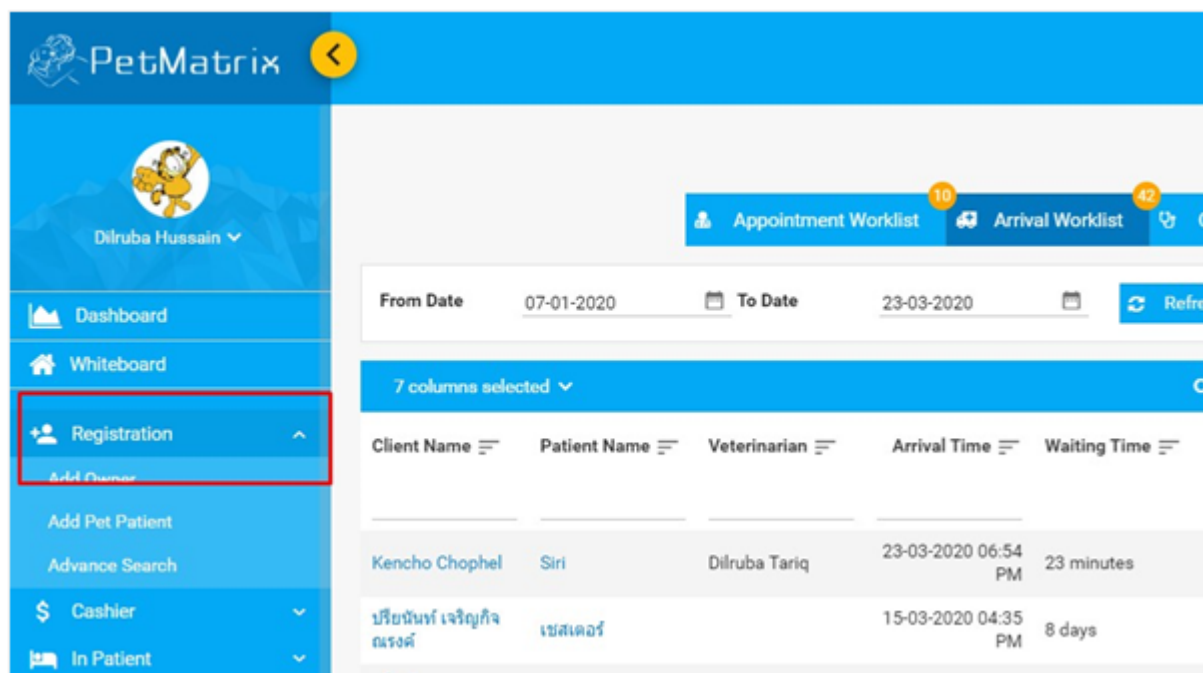

You can even view the details of the consultation

4. Using the System (OPD)

4.1. Registering a Pet Patient

If a pet/owner does not already exist, you will have to register the owner first, prior pet patient registration. We can go to Registration from the [Main Menu](#) and start filling in the details. Here's how to register a new pet patient and a new client:

STEP 1: Go to **Registration** from the Main Menu on the left.

STEP 2: Filling Owner details

Owner profile creation

Add Owner

Owner Information

4.2. Pet Patient Arrival

Whenever a pet patient arrives at the clinic, the arrival is marked right away. Marking a patient's arrival is the first task that needs to be done before any services can be taken by the pet patient.

You will typically need to mark a pet patient's arrival for:

- Each visit that a pet patient makes
- An appointment/consultation with a vet
- Admission to the clinic as an inpatient (IPD Arrival)

The Mark as Arrived
icon look like this

Mark as Arrived

- On this page, you can click on the names of the pet patient and client from the information cards to view their profile.
- You will need to fill in the following information on this page-
 - Arrival Time
 - Veterinarian
 - Weight (in lbs) : this field will only take in a numerical value
 - History: any previous medical conditions of the pet patient
 - Chief Complaint
 - Encounter and Encounter Type: you will need to select the type of visit the pet patient is going to make on the arrival. The categories are Medicine, Surgery, and Special. Depending on the encounter, the encounter types will be enlisted to specify the type of visit the pet patient is making. Here's the list of Encounter Types for Medicine, for example:

Encounter Medicine X v Encounter Type * Select Encounter Type

CONSULTATION

VACCINE

Pet Patient Arrival Information

6 columns selected v Global Filter

Note: Please note that you can directly choose an *Encounter Type* without having to select an Encounter category. Hence, just the *Encounter Type* is made a mandatory field.

- You can now click on **'Add to Consultation'**, and the Pet Patient Arrival Information will be listed on the table underneath. **Consultations** that are assigned to other veterinarians also show up in this list.

Pet Patient Arrival Information

6 columns selected v Global Filter

Arrival Time	Veterinarian	Visit No.	Consultation No.	Complain	Encounter Type	Action
23-10-2019 11:51		V20191023-10132	180	discomfort and obsessive itching	CONSULTATION	
23-10-2019 11:56		V20191023-10132	181		VACCINE	
23-10-2019 11:57		V20191023-10132	182	so many complaints, so little time	VACCINE	
23-10-2019 11:57		V20191023-10132	183	fdhtyiy	CONSULTATION	
23-10-2019 14:12		V20191023-10132	184	pet too shy for 20s	CONSULTATION	
24-10-2019 16:29		V20191023-10132	186		CONSULTATION	

- The arrival of the pet patient is now listed on both the Arrival Worklist and Pet Patient Arrival Information as you see above on **Mark as Arrived** page. You can now **start consultation** for the pet patient that has arrived.
- Canceling a Pet Patient Arrival** - Right-click on a patient information row and you can see the menu with an option to cancel the arrival for that pet patient.

Once you confirm the cancellation, an information bar at the top of the page will notify you about the changes:

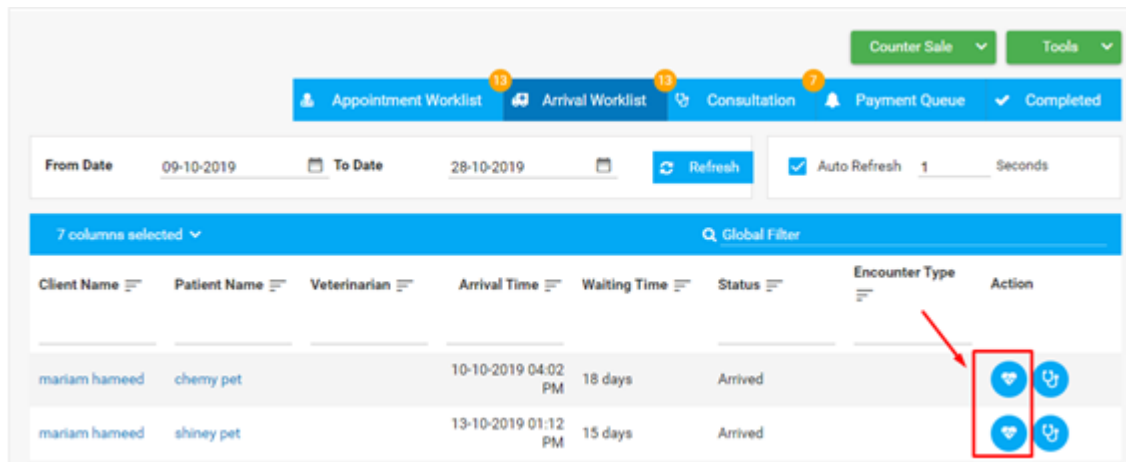

Vital Sign and Problem

Vital signs can be added once the pet patient is marked for arrival and is showing up in the **Arrival / Consultation Worklist (in the Whiteboard).**

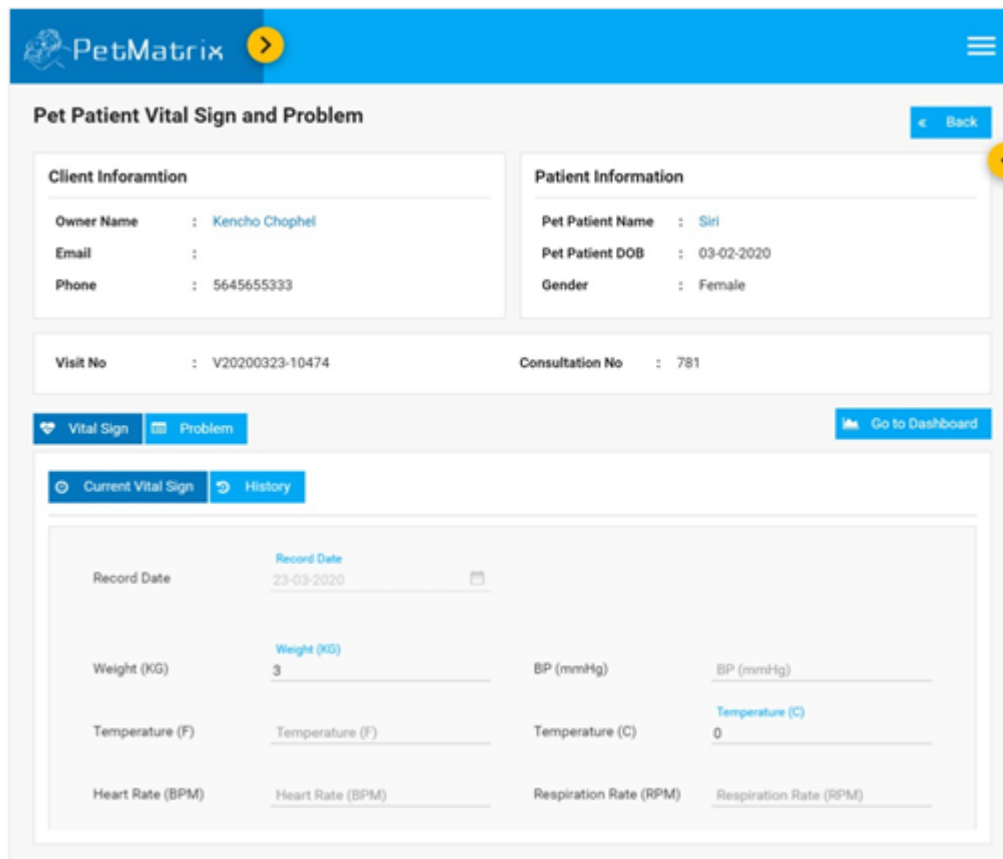

Vital signs can only be **added once** for a pet patient. You can later **update** the vital signs.

Here's how to add and update Vital Signs and Problems for a pet patient inside a worklist-

Clicking on the icon will take you the following page -

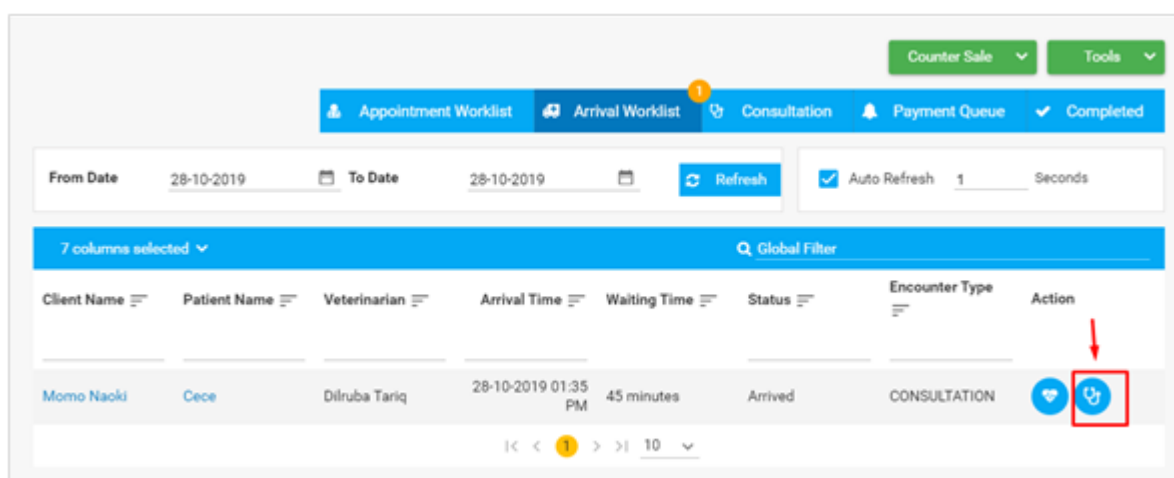

You can view the basic owner and patient info, and add values for the pet patient's vital Signs in the Current Vital Sign tab under Vital Signs.

The History tab next to it will conveniently show you all the past visits/consultations that the pet made to all the veterinarians. You can click on Go to Dashboard to return to the Arrival Worklist.

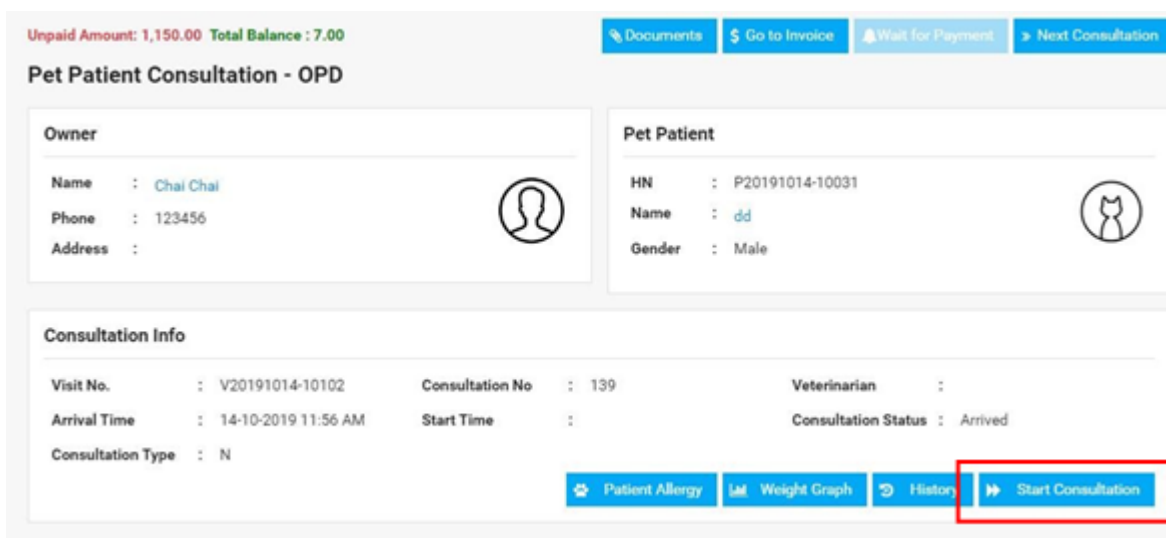

4.3. Pet Patient Consultation

Now that a pet has been registered, marked arrived and has its vital signs collected, you can proceed to start the consultation. **If a pet is registered, but is not marked arrived and is ready for a consultation, you will be directed to the Mark As Arrived page first before you can begin consultation for the pet.** Clicking on **Consultation** from anywhere will take you directly to **Mark As Arrived** first.

For a pet that is **registered and has arrival marked**, the name will show up on the Arrival Worklist as follows. You can now see the step-by-step process of how to proceed with a consultation.

STEP 1 : You begin the consultation by clicking on the **Start Consultation** button as highlighted in the picture below.

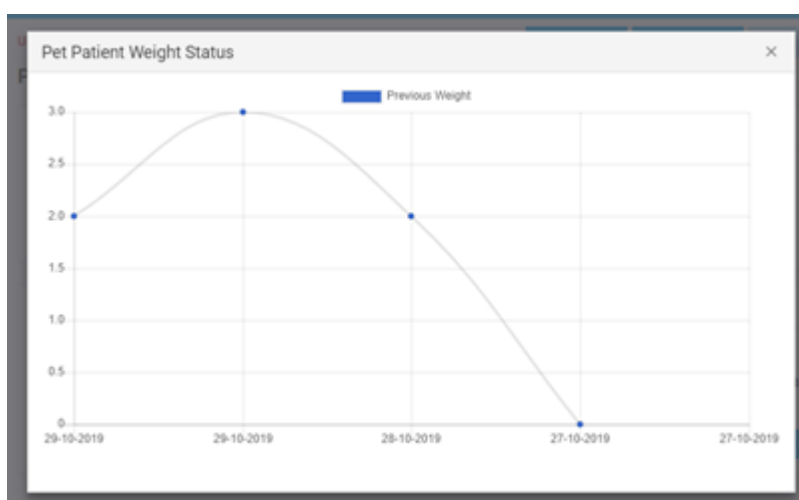

However, before you start, you can view all the important information regarding the pet on this page. This includes **Pet Patient Allergy, Weight Graph and any** previous history from past visits, consultations or diagnosis the pet may have had - all available in the **Consultation Info**

section of the page. You can see the buttons at the bottom of the section. Below is a much clearer view of these -

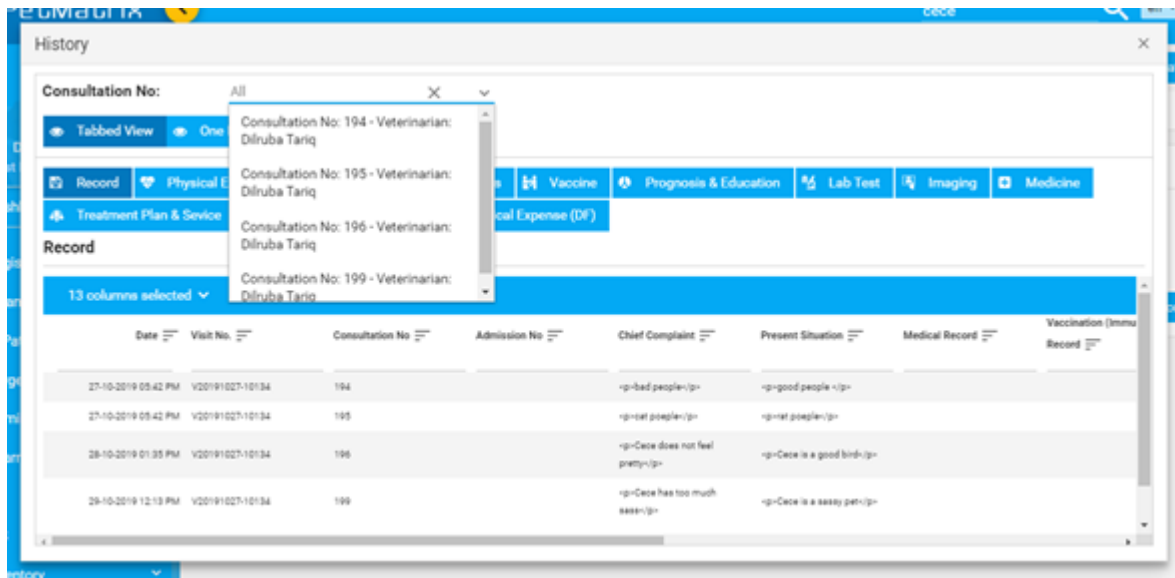

Start Time : Consultation Status : Arrived

 Patient Allergy  Weight Graph  History  Start Consultation

- You can add, view or delete Patient Allergies.
- Weight Graph shows a diagram that has tracked all weight values for the patient for every visit they made, so you can observe how the weight changed over time.

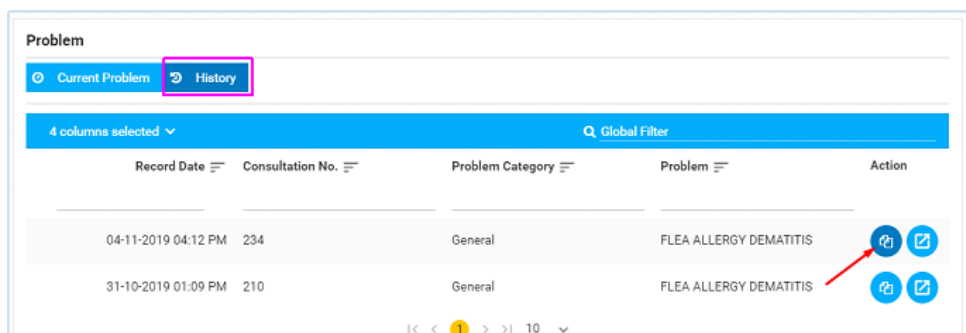

- History will display all the information in a pop-up. You can choose to view a particular consultation from the search column in the pop-up.

It is useful to note that after you start a consultation, every tab will have its own History tab included, to check on any previous records on the tab.

Here's an example from one of the tabs:

- You can expect to find a **History subtab** inside every main tab during the consultation.
- A few of the tabs (such as the ones where you record diagnosis, vital signs, and prognosis), will provide you the option to copy the history record to the current consultation.

Copy to this Consultation icon looks like this

Please note that this option is not relevant to all tabs during Consultation, so you will find the option in some of the tabs.

STEP 2 : After you have clicked on **Start Consultation**, you will find some drop down.

The screenshot shows a consultation interface with a top bar containing financial information (Due: 2,051.00, Balance: 0.00) and action buttons (Discard, EMR, Documents, Go to Invoice, Admit, Wait for Payment). Below this is a patient information bar. A central row of tabs includes Packages, Estimations, Patient Allergy & Remarks, Weight Graph, History, and Start Consultation. A second row of tabs includes Record & Physical Examination (highlighted in blue), Chargable(s) (highlighted in green), and Prognosis, Education & Follow Up. To the right of these tabs are icons for viewing, printing, and saving changes, along with a legend for Empty (blue), Data (green), and Active (blue). Below the tabs are two expandable sections: Vital Sign and Physical Check Up.

 Tab items marked in **BLUE** involve ordering products and services, and have costs related to them. Any tests or products

The tabs items will include the following:

- **Record & Physical Examination**

The tabs contain **Vital Sign, Physical Check up, Record, Problem, Diagnosis, Treatment Plan & Service, and Treatment Plan**. Displays any previous medical records and patient history -

Vital Sign- The user has to provide input after checking the patient. The value will be assigned to the **Current Vital Sign**. After another consultation, the user will find the previous **Vital Sign** record in the **History** tab. The user would usually already encounter a **Vital Sign and Problem** option on the **Arrival Worklist**, where they can input the patient's vital signs before the consultation starts. The information is retained when the consultation proceeds, and you can edit or update the vital signs here on this tab, too:

Vital Sign

15-03-2022 05:00 PM	Abnormal	Normal	Need Bed	Need one	
< > 1 > > 10					

You will find an Add Record button if the current record is deleted.

• Problem and Diagnosis tab

Adding a problem - This is where you identify and add what specialty the problem is, and the type of problem that was identified:

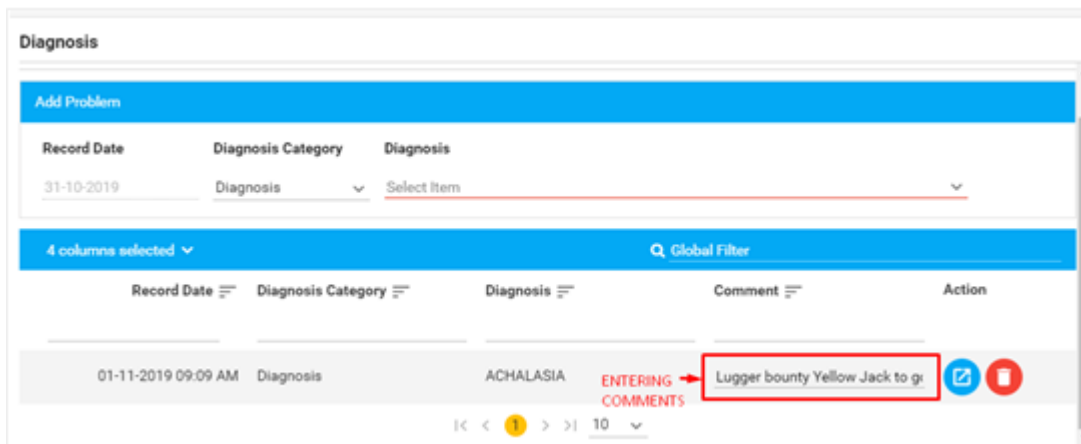

Problem		
Current Problem History		
Add Problem		
Record Date	Problem Category	Problem
13-04-2022	Select a Category	Select Item
Problem Category, Problem Global Filter		
Problem Category	General Oncology Musculoskeletal Cardiovascular Respiratory	Problem Action
< > 1 > > 10		

The drop-down lists all the problems under the chosen Problem Category, which is then added to the list right below.

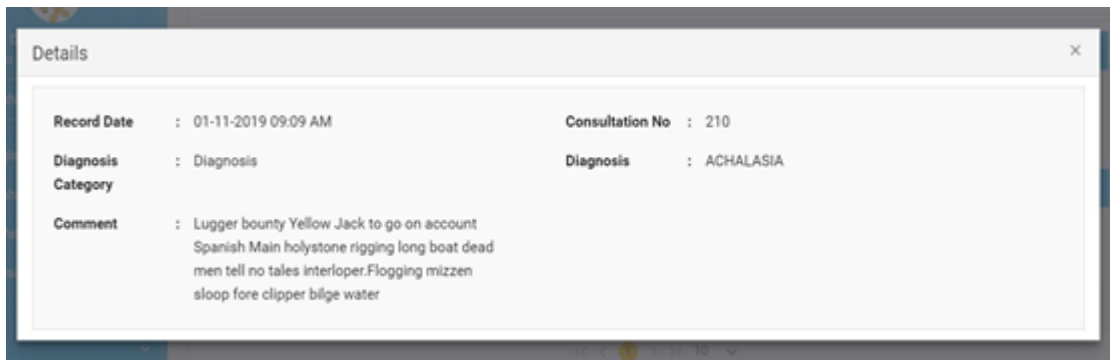

Problem		
Current Problem History		
Add Problem		
Record Date	Problem Category	Problem
31-10-2019	General	Select Item(s)
Problem Category, Problem Global Filter		
Problem Category	Problem	Action
General	FLEA ALLERGY DEMATITIS	

You can now see the details of the entry you made (*View* button under *Action*), or delete a problem type that you added.

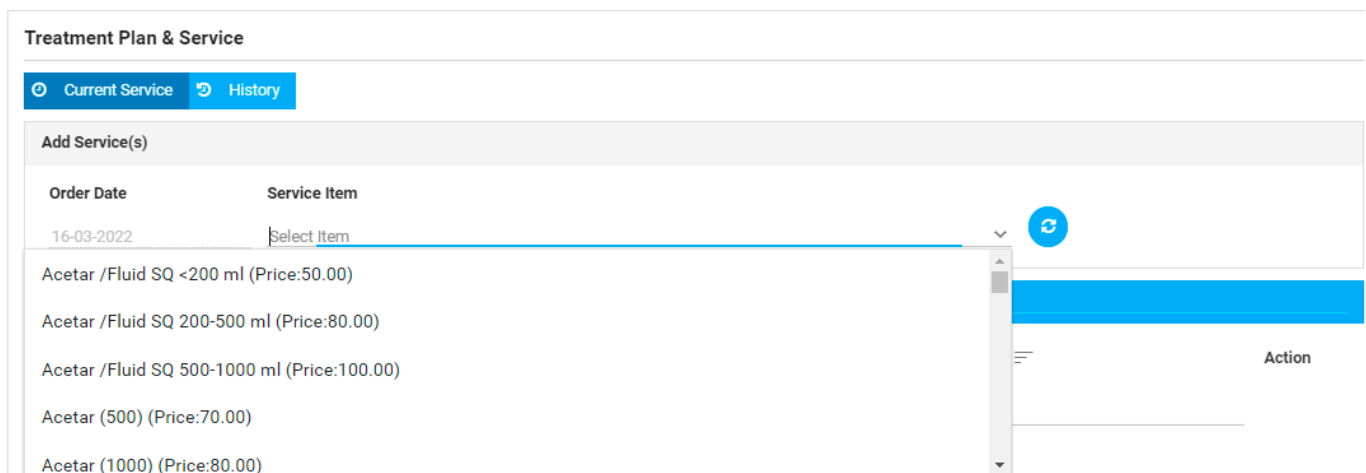

Like Problems, the features are the same for Diagnosis, except that you have an additional option to add comments after you add a diagnosis:

Once you click on the *View* button, you can see the full comment that you entered:

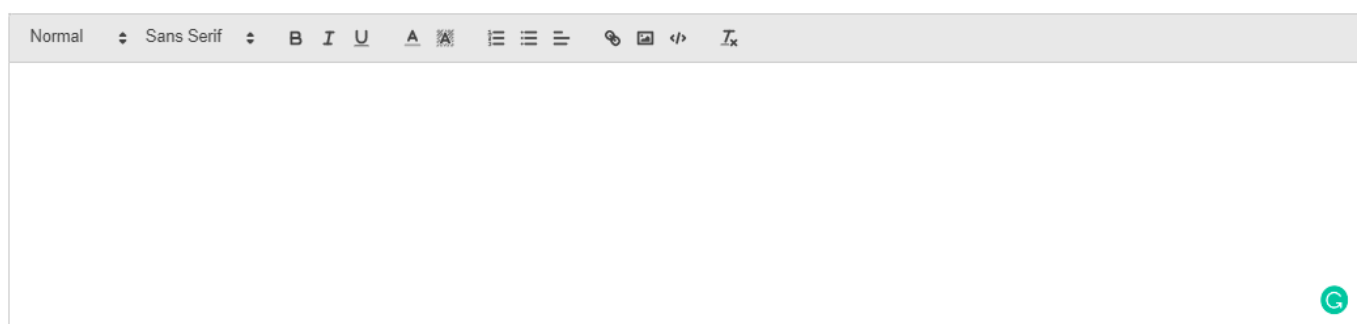

Treatment Plan & Service- The user can add services from the dropdown.

Treatment Plan- The user can note the treatment plan from here.

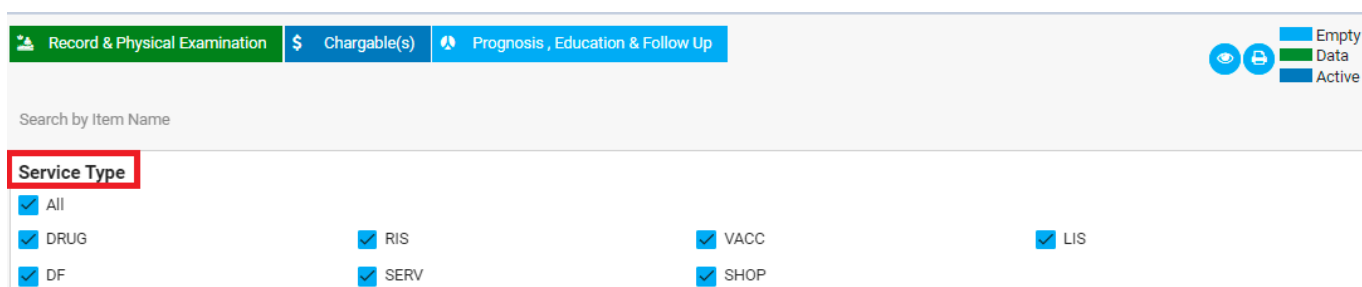

Treatment Plan

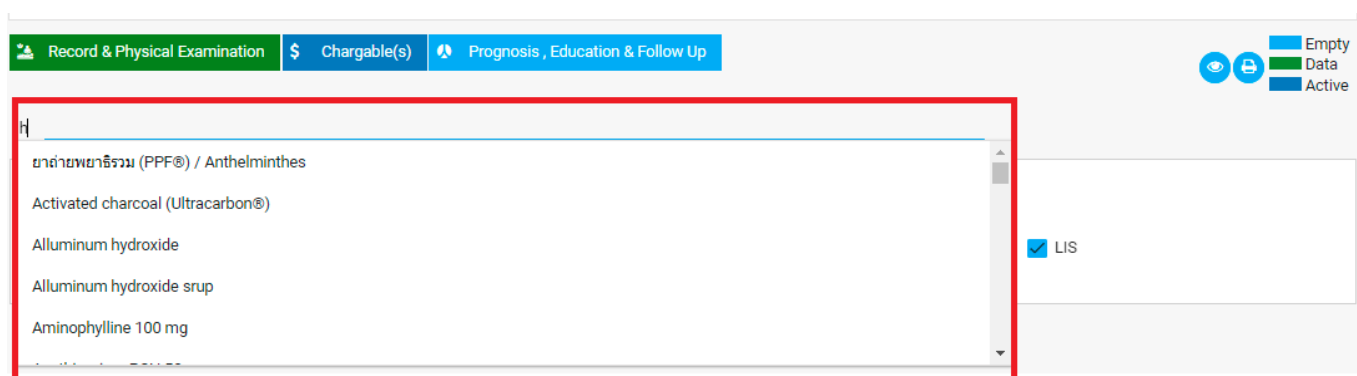

The screenshot shows a 'Treatment Plan' section with a rich text editor. The toolbar includes options for text color, font family (Sans Serif), bold, italic, underline, link, unlink, list, and indent. The text area is empty, and a green circular icon is visible in the bottom right corner.

Chargeable

In this section, the user can choose any service type. They have to choose the checkbox of service type and then select the item from the search bar.

The screenshot shows the 'Chargeable' section with three tabs: 'Record & Physical Examination', 'Chargable(s)', and 'Prognosis , Education & Follow Up'. The 'Chargable(s)' tab is active. Below the tabs is a search bar labeled 'Search by Item Name'. A red box highlights the 'Service Type' section, which contains a grid of checkboxes for various service types: All, DRUG, DF, RIS, SERV, VACC, and LIS.

The screenshot shows the 'Chargeable' section with the same tabs as the previous image. A red box highlights a dropdown menu that appears when a search bar is used. The dropdown menu lists several items: 'ยาถ่ายพยาธิรวม (PPF®) / Anthelminthes', 'Activated charcoal (Ultracarbon®)', 'Alluminum hydroxide', 'Alluminum hydroxide srup', and 'Aminophylline 100 mg'. The 'LIS' checkbox is also visible in the background.

Lab test

To order a lab test, you simply select a test from the dropdown menu. The Lab Test Itemfield will show suggestions as you keep typing, so you can do a search easily.

You can *view* the details, and *delete* an expense if needed.

All the tabs and options may or may not be used during a consultation. Depending on the veterinarian's observations, he can order imaging or lab tests, or simply prescribe some medicine if that is all that's needed.

STEP 3: Processing Payments after Consultation ends.

After the consultation is complete, you can process the payment immediately (Go to Invoice) or keep the payment in a queue (Wait for Payment), depending on when the client is going to make the payments.

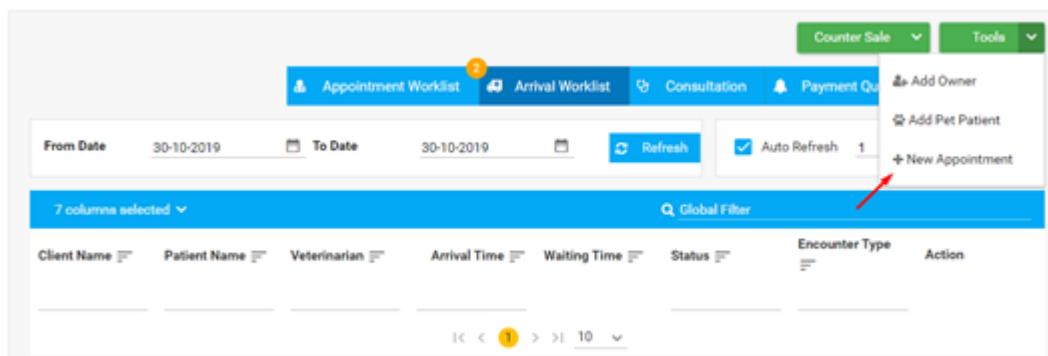

1.1.

4.4 Making an Appointment

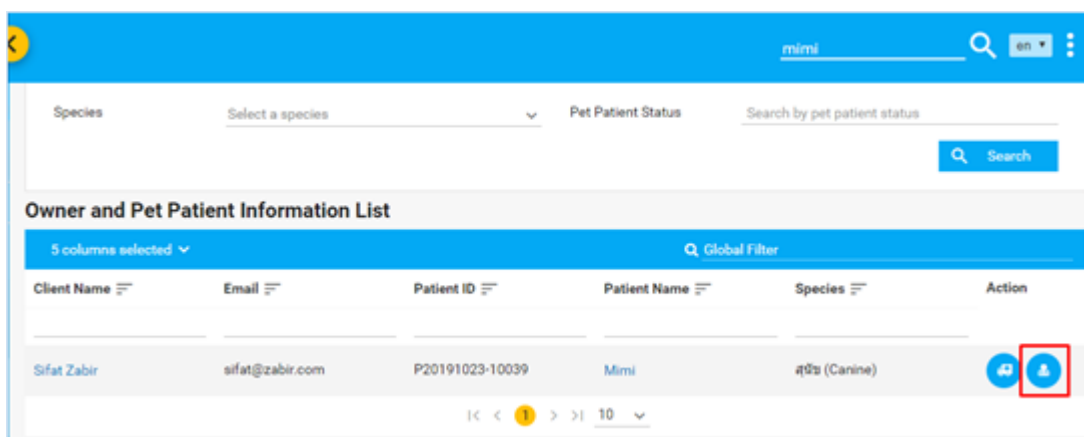

The Appointment icon looks like thi

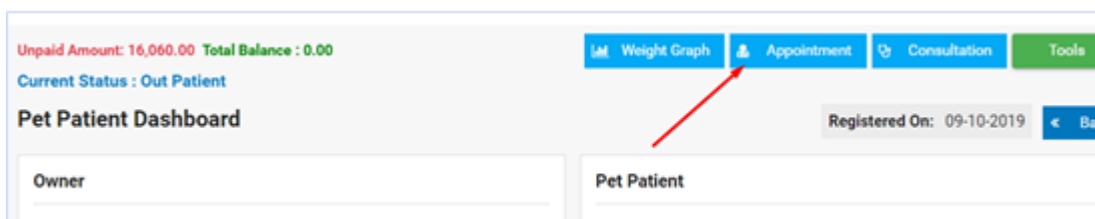

From the Whiteboard, you can create a New Appointment from Tools option on the top right corner. This is the easiest accessible option to create an appointment from scratch:

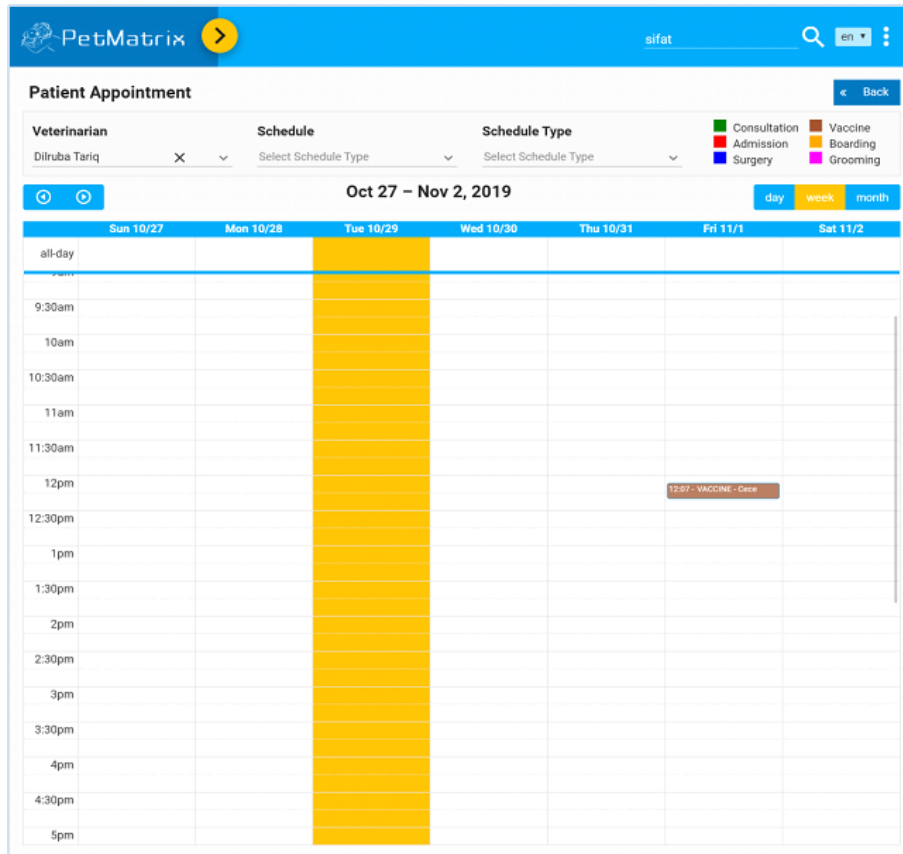

You can also look up either the pet or the owner's name using the global search, and you will be able to see the Appointment icon right next to the Mark Arrival icon.

Alternatively, you can schedule an Appointment from the [Pet Patient Dashboard \(4.3\)](#)

Once you go to the Appointment icon, the following page will show:

- You will need to select the Veterinarian, Schedule, and Schedule Type first, and then click on an available spot in a column.
- You can see all the available Schedule Type even if you do not select a Schedule.
- There is a color code for each type of appointment you make for a pet patient. Here's a clearer view of the color code table:

■ Consultation	■ Vaccine
■ Admission	■ Boarding
■ Surgery	■ Grooming

Making an appointment for Consultation/Vaccine:

STEP 1: Choose Schedule Type to be Consultation

Confirm Admission

As you may see, you have the options to select the Bed Information which is made mandatory, in case you have not allocated a bed to the inpatient **during reservation** already. You can also directly enter the payment advance here.

The screenshot shows the 'Admission Information' form. The 'Advance Collection and Admission Information' section includes fields for Veterinarian (Dilruba Tariq), Reference Doctor (พศ. เอกชัย กัทรพันธ์ชัย), Discharge Date (01-01-1970), and Bed Information (Available Beds). The 'Advance Payment Information' section includes fields for Payment Mode (Select a payment mode), Admission Reason (Cash), Advance Status (Card), and Advance Payment. A 'Confirm Admission' button is at the bottom right.

Once you have the Bed Information and Payment Information section filled out, you will be able to confirm the patient admission:

The screenshot shows the 'Admission Information' form with the 'Bed Allocation Information' section added. This section includes fields for Bed Id (4) and Bed Charge (250). The 'Advance Payment Information' section now shows Payment Mode (Cash), Admission Reason (ดูแลก่อนผ่าตัด-หลังผ่าตัด), Advance Status (Unpaid), and Advance Payment (10). A red arrow points to the 'Confirm Admission' button at the bottom right.

The pet patient is now listed inside both IPD Worklist and Admitted Patient list.

5.2. IPD Worklist / My Pet Patient (Doctor Wise Worklist)

The IPD Worklist lets the user manage *consultation* and *vital signs* of all the pet patients that are admitted from this Dashboard:

The screenshot shows the 'In Patient Worklist' dashboard. The left sidebar contains a menu with the following items: Dashboard, Registration, Cashier, In Patient (expanded), IPD Worklist (highlighted with a red box and a red arrow), Reservation List, Admitted Patients, Discharge Queue List, Discharged Worklist, Bed Cleaning Worklist, My Pet Patients, Nursing, RIS, LIS, and Pharmacy. The main area displays the 'In Patient Worklist' with tabs for Appointment Worklist, Arrival Worklist, Consultation, and Completed. Below the tabs are filters for From Date (26-11-2019) and To Date (26-11-2019), a Refresh button, and an Auto Refresh checkbox set to 2 seconds. A table with 7 columns is shown: Client Name, Patient Name, Veterinarian, Arrival Time, Waiting Time, Status, and Encounter Type. The table contains 6 rows of data. The Action column contains icons for heart and pulse.

Client Name	Patient Name	Veterinarian	Arrival Time	Waiting Time	Status	Encounter Type	Action
Hopkins M	Kat		26-11-2019 11:50 AM	5 hours	Arrived		
Momo Naoki	Riri		26-11-2019 12:16 PM	4 hours	Arrived		
Hopkins M	Kat		26-11-2019 12:21 PM	4 hours	Arrived	CONSULTATION	
Momo Naoki	Riri		26-11-2019 04:23 PM	20 minutes	Arrived		
Saki Konami	Kitkat		26-11-2019 04:33 PM	10 minutes	Arrived		

This is similar to [OPD Consultation Dashboard](#), except that it is for inpatients only. The dashboard is quick access to recording the inpatient's *vital signs* and *consultation data*.

In Patient Worklist

Appointment Worklist **5** Arrival Worklist **1** Consultation **1** Completed

From Date 26-11-2019 To Date 26-11-2019 Refresh ☒ Auto Refresh 2 Seconds

Discharge Condition: ☐ Uncommented ☐ Cured ☐ Relieved ☐ Unchanged ☐ Deteriorated ☐ Expired ☐ Autopsy

Discharge Note :

Template Name : bxbxbx

Normal Sans Serif B I U A       

Dear 9999

This letter is to inform you that I will no longer be your attending physician. This is primarily due to your successive failure to keep several appointments reserved exclusively for you.

I suggest that you find another physician immediately to provide your medical needs. Any delay could jeopardize your health, so I advise you do it as soon as possible.

You fill in details about the discharge such as **discharge type**, **condition** and **discharge notes**, and **Template Note** although these are not mandatory. You can also view the medications prescribed to the patient during previous consultations, and prescribe new medications while discharging-

Bed Transfer

When needed, you can transfer a pet patient's bed using this action. Clicking on the icon opens up the following pop up window-

Bed Transfer			
Current Allocated Bed Information			
Bed Id	: 17	Ward	: WD-1
Bed Charge	: 250	Allocated Date	: 26-11-2019
Bed Information *	: Available Beds		

Clicking on [Available Beds](#) opens up a list of available beds to transfer to:

Reservation Details								
Q Global Filter								
Building Name	Floor Name	Ward Number	Room Type	Room Number	Bed Number	Bed Charge	Bed Status	Action
อาคารส้ว วิทยรักษ์	ชั้น 1	1	Cat Recovery Room	1	8	250	Free	
อาคารส้ว วิทยรักษ์	ชั้น 1	1	Cat Recovery Room	1	18	250	Free	
อาคารส้ว วิทยรักษ์	ชั้น 1	1	Cat Recovery Room	1	19	250	Free	
อาคารส้ว วิทยรักษ์	ชั้น 1	1	Cat Recovery Room	1	20	250	Free	 Select
อาคารส้ว วิทยรักษ์	ชั้น 1	1	Cat Recovery Room	1	21	250	Free	

Once you've selected a bed from the list, hit Transfer:

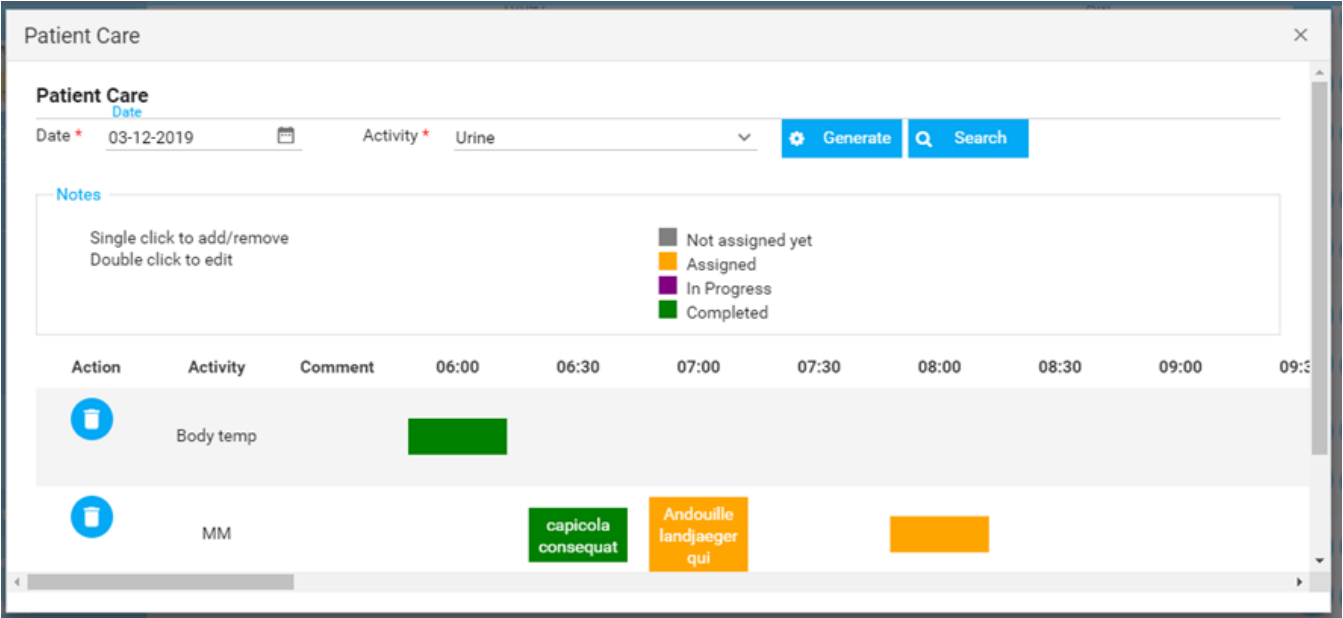

Bed Transfer	
Current Allocated Bed Information Bed Id : <u>17</u> Ward : WD-1 Bed Charge : 250 Allocated Date : 26-11-2019 Bed Information * : Available Beds	New Allocation Bed Information Bed Id : <u>20</u> Ward : WD-1 Bed Charge : 250 

Your patient is now allocated the new bed.

Note: You will not be able to see a bed listed if it is still in queue of Bed Cleaning worklist.

Monitoring takes you to the Patient Care tab without having to go to a consultation for it. You can see the following pop-up once you click on the Monitoring icon-

The monitoring is done the same way activities are tracked in the [Patient Care tab of IPD Consultation](#).

5.4. Discharging a Pet Patient

A pet patient can be discharged from the [Admitted Patients](#) worklist. After the patient is discharged, the pet patient's name is moved to the Discharge Queue list-

Here's a short series of screenshots to show at a glance how to discharge an inpatient-

Admission Worklist							
7 columns selected				Global Filter			
Client Name	Patient Name	Patient ID	Veterinarian	Admission No	Admission Date	EST. Discharge Date	Action

6.2. Requested Surgery Worklist

All/any upcoming appointments show up in the Surgery Appointment Worklist. You can confirm an appointment only if the owner has made an advance. You can check under Advance Status to see if any advance has been made by the owner.

Once an advance is paid, you can confirm the patient so the patient is sent to Confirmed Surgery Worklist. You can cancel an Appointment if the client has not made an advance, or if the client wants to cancel the appointment.

6.3. Confirmed Surgery Worklist

A window appears where you can view past results the pet patient may have had for radiology tests:

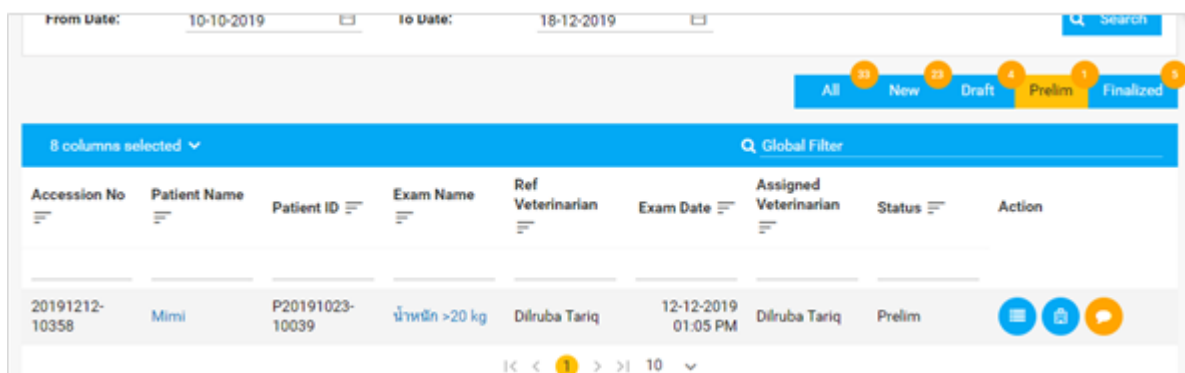

You can close the window by scrolling down to find the Close button-

NOTE: You can also view Results History from any other tab inside Radiology Worklist.

Once you move a result from Drafts to Preliminary (Prelim), you cannot revert it back to Drafts. You can move it to Final, where the Final results can be viewed by other veterinarians.

Result Entry Form

Owner and Pet Patient Information

You will also need to select the pharmacy Location from which the medicines were ordered. This is the location the veterinarian/you have selected **when placing the prescription-**

Medicine

☒ Current Medicine
 ☐ History

Add Medicine

Order Date : 09-12-2019

Pharmacy Location * Medicine Item

Select a Location Select Item

7 columns selected Global Filter

Item Name	Price	Quantity	Total	Instruction	Action
Building 1 Pharmacy 1					
Building 1 Pharmacy 2					
Building 2 Pharmacy 1					
Building 2 Pharmacy 2					

After you have selected the location, click on Search and the medicine orders for that location will show up-

The screenshot shows the 'Dispense Worklist' interface. At the top, there are filters for 'OPD' (selected) and 'IPD', 'From Date' (18-09-2019), 'To Date' (26-12-2019), and 'Location' (Building 1 Pharmacy 1). A dropdown menu is open for the 'Location' field, showing options: 'Building 1 Pharmacy 1', 'Building 1 Pharmacy 2', 'Building 2 Pharmacy 1', and 'Building 2 Pharmacy 2'. The 'Search' button is highlighted. Below the filters, there are tabs for 'All', 'Preparation work list', 'Waiting for dispense', and 'Dispensed'. A table with 9 columns is displayed, showing client and patient information, consultation number, invoice number, order ID, veterinarian, order date, location name, status, and action buttons.

Client Name	Patient Name	Consultation No.	Invoice No	Order ID	Veterinarian	Order Date	Location Name	Status	Action
Bear Gracie	BearPet	349		107	Emdadul Haque	24-12-2019 03:30 PM	Building 1 Pharmacy 1	New	[Action Buttons]
Daisy Rocky	DaisyPet	347		106	Emdadul Haque	24-12-2019 12:22 PM	Building 1 Pharmacy 1	New	[Action Buttons]
Saiki Konami	Nemo	340		104	Dilruba Tariq	19-12-2019 07:03 PM	Building 1 Pharmacy 1	Dispensed	[Action Buttons]
Haruki Murakami	Kito	227		90	Surajit Sarkar	31-10-2019 03:14 PM	Building 1 Pharmacy 1	New	[Action Buttons]

The screenshot shows the 'Dispense Worklist' interface with the 'Preparation work list' tab selected. The 'Location' dropdown is now set to 'Building 1 Pharmacy 2'. The table displays medication orders for this location. The 'Status' column shows 'New' for all entries.

Client Name	Patient Name	Consultation No.	Invoice No	Order ID	Veterinarian	Order Date	Location Name	Status	Action
พญ.ดร.พญ.ดร.	นพ.	309		76	พญ.ดร.ดร.ดร.	06-12-2019 09:35 AM	Building 1 Pharmacy 2	New	[Action Buttons]
Sifat Zabir	Layla	234		52	Dilruba Tariq	04-11-2019 05:11 PM	Building 1 Pharmacy 2	New	[Action Buttons]
mariam hameed	samy pet	142		28	Emdadul Haque	14-10-2019 01:40 PM	Building 1 Pharmacy 2	New	[Action Buttons]

You can now start preparing the medicine. There are 4 tabs inside the **Dispense Worklist** to keep track of the dispense status of the medications:

After you have saved the changes, you can also print the labels for the new medicines added:

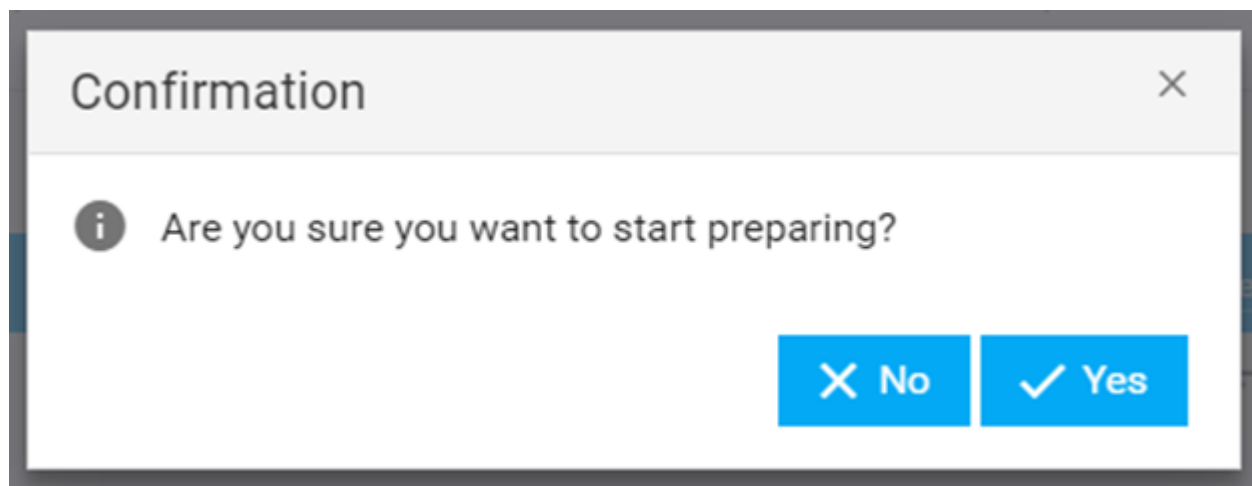

Apart from adding new items to prescriptions, you can also view and add **Allergy Information** from the top right button inside **Item Details** window.

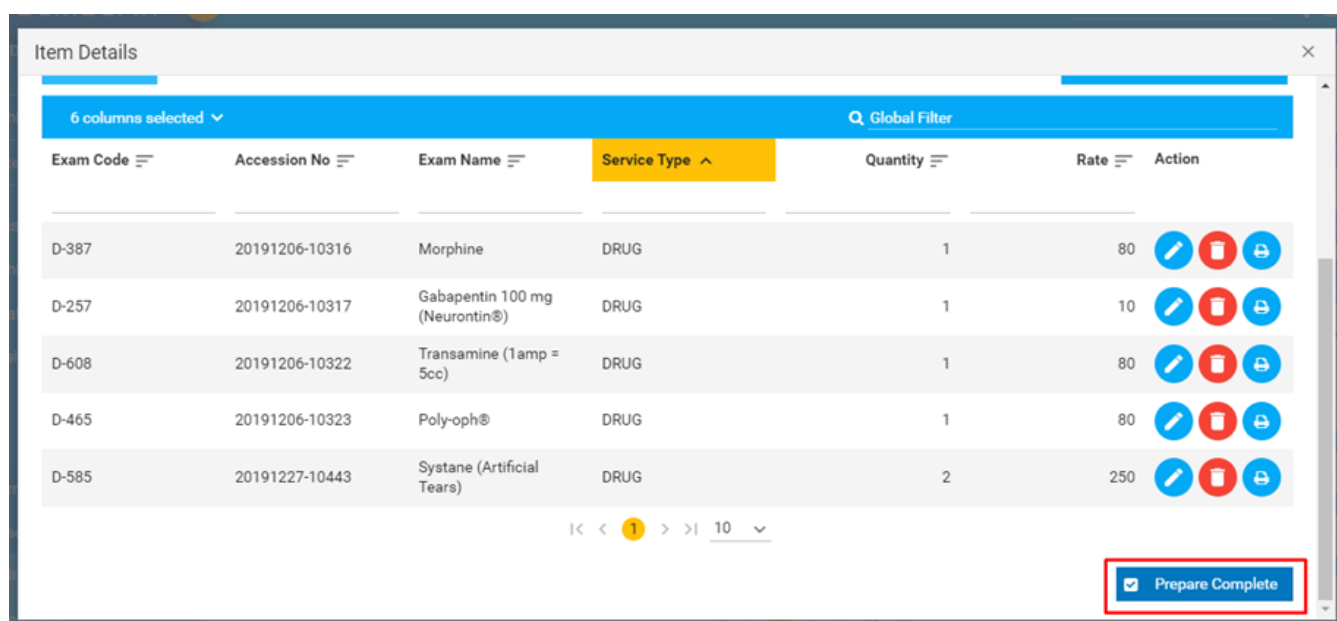

You can now close out the Allergy Information window using the cross icon at the top right corner, and click on **Start Preparing**.

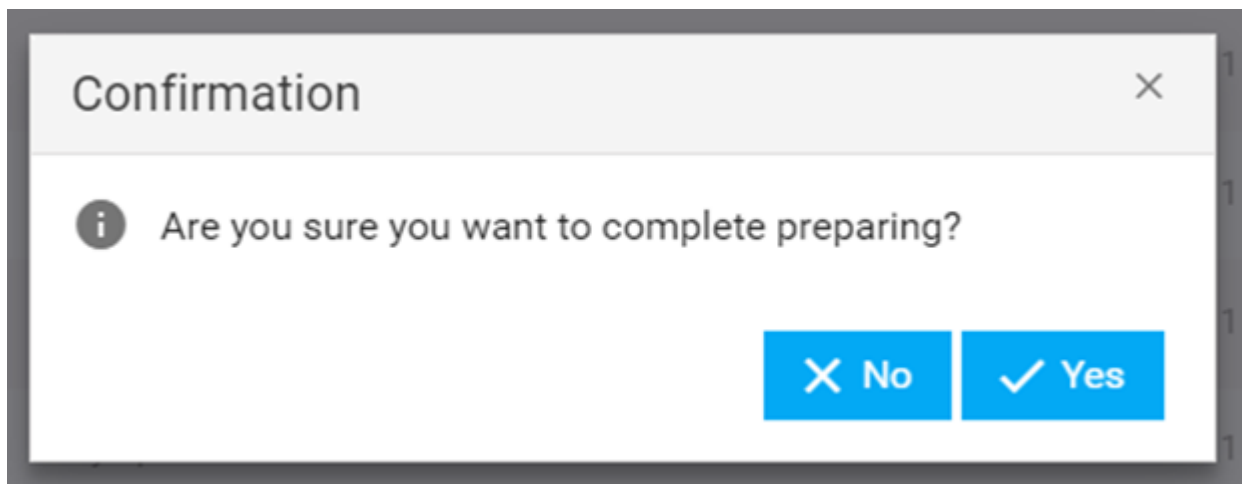

You will be asked to confirm about this with a message:

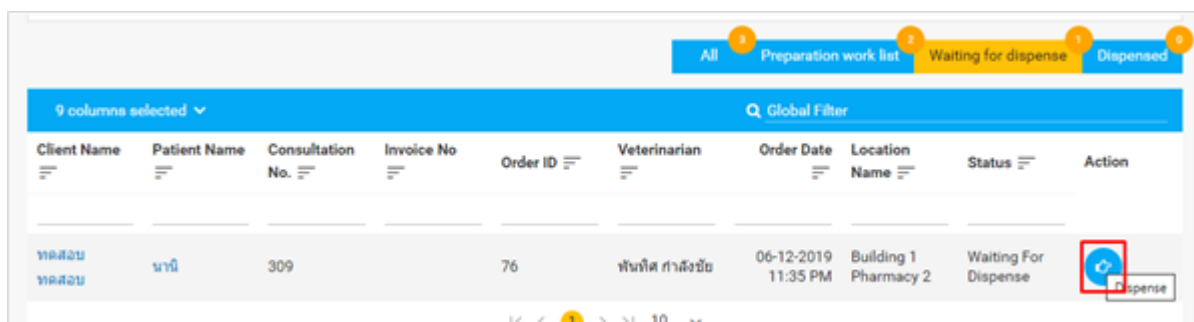

After you have prepared the medicine, you can go ahead and click on **Preparation Complete**, so the medicine is ready to be dispensed-

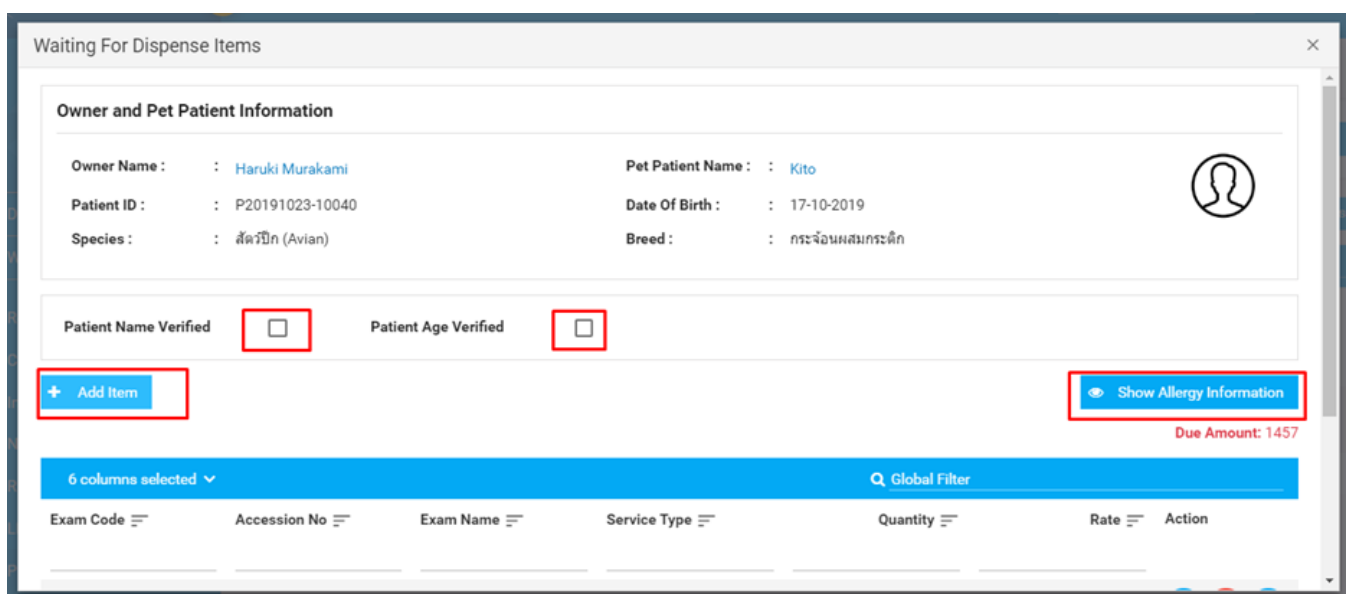

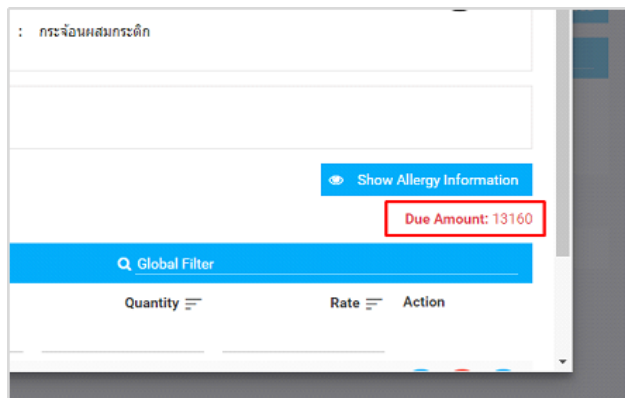

The order is now moved to **Waiting for Dispense** tab, where the medicine is ready on the counter and is ready to be dispensed to the customer.

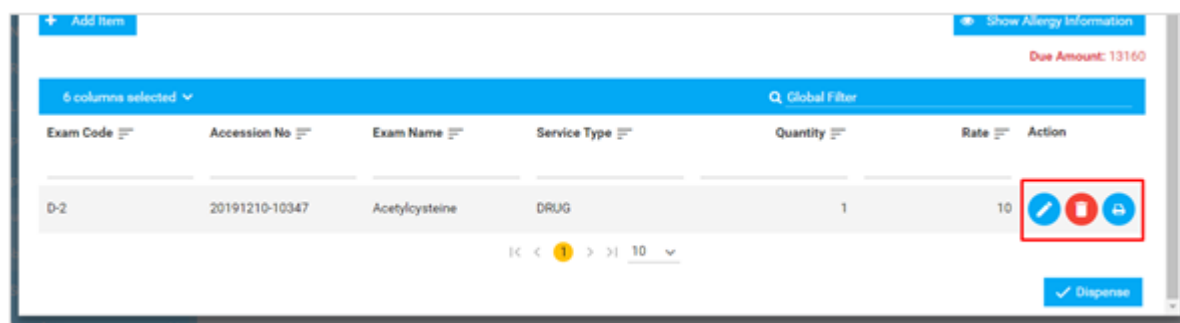

Once you click on the **Dispense** icon, you should see the following window:

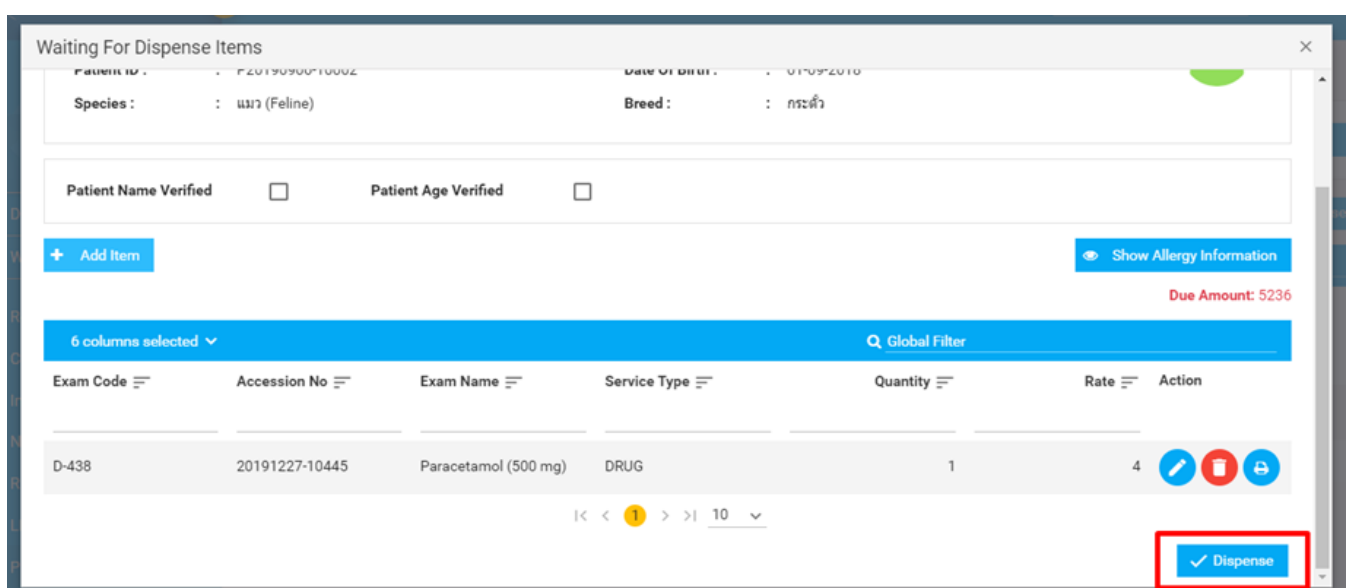

Before you can dispense the medication, you should verify the patient's name and age, although this is not mandatory. You can also add more items to dispense, and modify allergy information from here. The **Due Amount** is also shown on this window:

You can still make changes to the prescription on this window using the **Edit** icon, **Delete** a medicine, and **print labels**.

You can now **Dispense** the items once modifications are done.

11. Exceptional Features

11.1. Tools

Tools might become one of the most used features if you are logging into PetMatrix everyday. It lets you go to 4 important pages from a single dropdown -

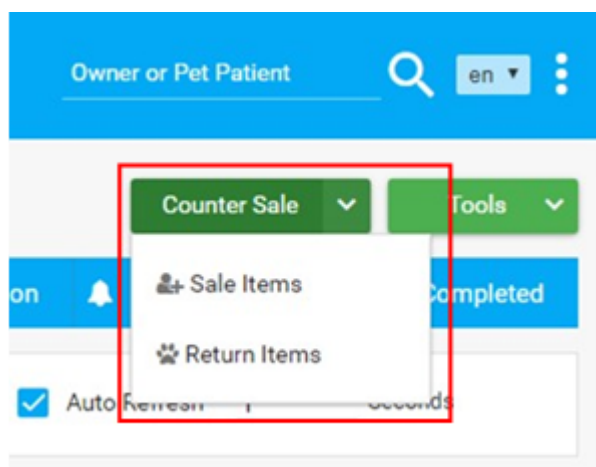

Clicking on the options directly takes you to the profile creation pages, or the [appointment calendar](#). **Tools** is handily available inside the top right corner of the **Whiteboard**.

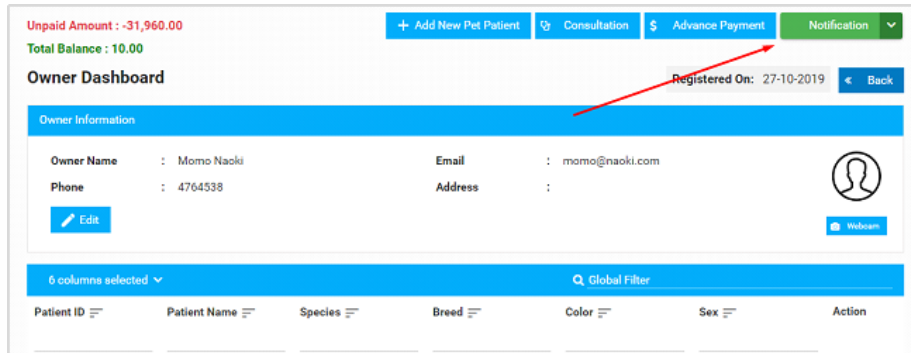

11.2. Counter Sales

This feature is added so anyone can purchase items/medications from the hospital without having to visit a veterinarian or a prescription. However, the person will have to be registered as a client to be able to buy or return any items purchased at the counter.

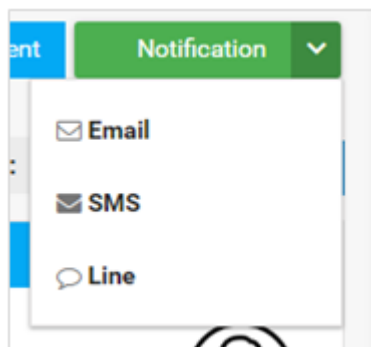

11.3. Notifications

The Notification menu can be found from the [Owner's/Client Dashboard](#)-

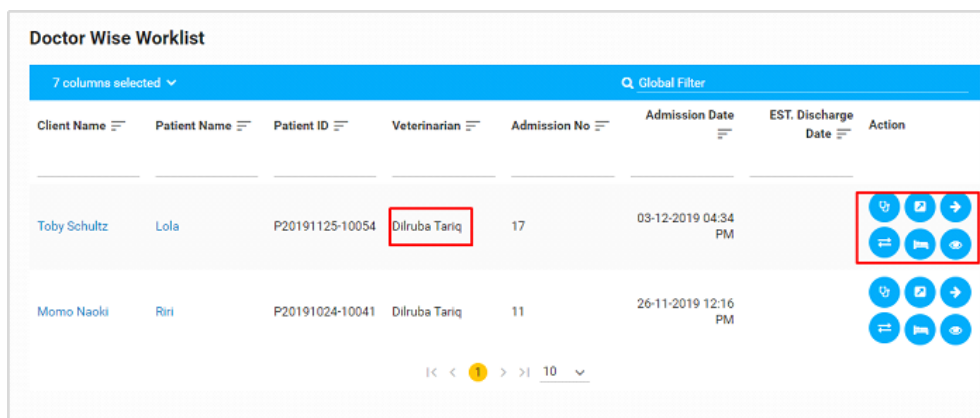

Here's the full dropdown showing all the options:

11.4. My Pet Patients

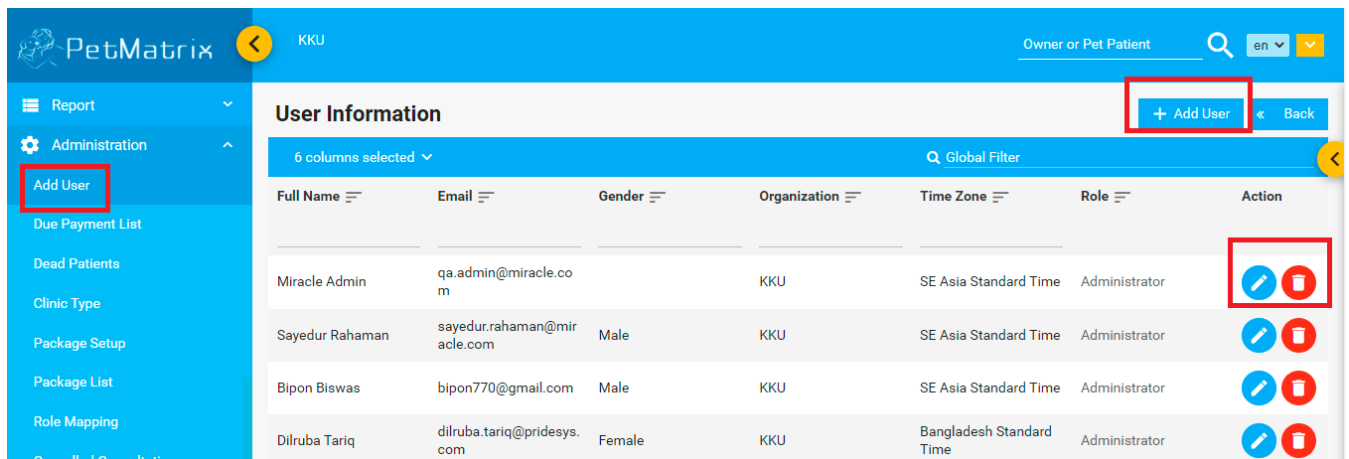

This section is the same as the [Admission Worklist](#), except you see only your patient list.

12. Administration

12.1 Add User

In this section, the user can know the information and add new users. The user can edit and delete users from this section.

12.5. Package Setup

The user can set up a package from this section. The user has to fill up the **package information** along with **package item information**.

The screenshot displays the 'Add New Package' form. It is divided into two main sections: 'Package Information' and 'Package Item Information'.

Package Information:

- Package Name***: A text input field with the placeholder 'Package Name'.
- Package Description**: A text area with a placeholder '| '.
- Package Valid From ***: A date picker showing '02-02-2022'.
- Package Valid To ***: A date picker showing '04-03-2022'.

Package Item Information:

- + Add**: A button to add new items.
- Total rack price: 0** and **Total package price: 0**: Displayed at the top right of the section.
- 6 columns selected**: A dropdown menu.
- Global Filter**: A search bar.
- Table Headers**: Date, Category, Item Name, Rack Rate, Price, Quantity, and Action.
- Table Content**: A table with 7 columns and 10 rows (indicated by a '10' in the pagination).
- Save** and **Cancel**: Buttons at the bottom.

12.6. Package List

The user can add packages and can check the list of the packages. They can also **Add packages** from this section. Same as before, the user will redirect to **Add new package** page.

This screenshot is identical to the one in section 12.5, showing the 'Add New Package' form. It includes the 'Package Information' section with fields for Name, Description, and Validity, and the 'Package Item Information' section with an 'Add' button, price totals, a table with 7 columns (Date, Category, Item Name, Rack Rate, Price, Quantity, Action), and pagination controls.

Also, they can see the active/inactive package from the above button.

Package List

12.8. Cancelled Consultations

The cancelled consultation worklists will be found here.

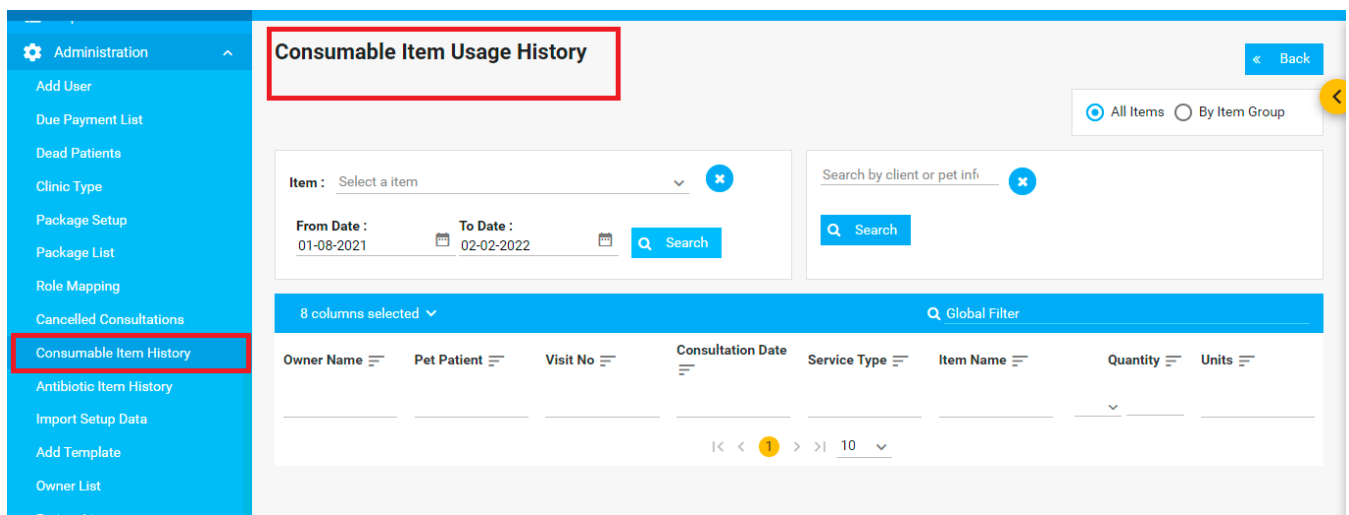

The interface for 'Cancelled Consultation Worklist' features a top navigation bar with a 'Back' button. Below this is a search bar with 'From Date' (01-11-2021) and 'To Date' (02-02-2022) fields, and a 'Search' button. A table header bar indicates '6 columns selected' and includes a 'Global Filter' search. The table columns are: Client Name, Patient Name, Veterinarian, Consultation Date, Consultation Type, Reason, and Action. A single data row is visible for 'Moum Tui' (Pet 1) by 'Bipon Biswas' on '29-11-2021 05:59 PM' for an 'IPD' consultation, with the reason 'urgent'. A pagination bar at the bottom shows '1' of 10 items.

Client Name	Patient Name	Veterinarian	Consultation Date	Consultation Type	Reason	Action
Moum Tui	Pet 1	Bipon Biswas	29-11-2021 05:59 PM	IPD	urgent	

12.9. Consumable Item History

The consumable item details will be found in this section.

The 'Consumable Item Usage History' interface includes a sidebar menu with 'Consumable Item History' highlighted. The main area has a title bar with a 'Back' button. Below the title bar are two search filters: 'Item' (a dropdown menu) and 'Search by client or pet info'. A date range filter shows 'From Date' (01-08-2021) and 'To Date' (02-02-2022) with a 'Search' button. A table header bar indicates '8 columns selected' and includes a 'Global Filter' search. The table columns are: Owner Name, Pet Patient, Visit No, Consultation Date, Service Type, Item Name, Quantity, and Units. A pagination bar at the bottom shows '1' of 10 items.

Owner Name	Pet Patient	Visit No	Consultation Date	Service Type	Item Name	Quantity	Units
------------	-------------	----------	-------------------	--------------	-----------	----------	-------

12.10. Antibiotic Item usage history

The antibiotic item usage details will be found in this section.
